Guidance Information

Definitions

Marine or composite project refers to a project carried out in a marine or composite workplace, and includes a defined set of activities, processes, or multi-step tasks that should be completed over a set period of time, such as installation of pipework in a boat, a boat construction project, production of a cored laminate product, or bisphenol resin product.

Project team refers to a group of individuals working together to complete the project.

Outcomes and performance criteria

Outcome 1

Explain team member roles and interactions for a marine or composite project.

Performance criteria

- 1.1 The team members roles are explained in terms of the project.
- 1.2 The interactions of the team members are explained in terms of the project.

Outcome 2

Actively participate in project activities and reflect on a team performance for a marine or composite project.

Performance criteria

- 2.1 Individual participation within the team is verified in terms of the project.
- 2.2 Issues or problems encountered during the project that are related to individual or team performance are reflected upon in terms of future improvement.
