

Title	Install an agricultural or horticultural water reticulation system		
Level	3	Credits	10

Purpose	People credited with this unit standard are able to: select equipment, machinery, and materials for the installation operation; install the water reticulation system; and carry out post-operational procedures.
----------------	---

Classification	Rural Contracting > Agricultural Contracting
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Installation is to a supplied system plan.
- 2 The following legislation and requirements apply to this unit standard:
 - Health and Safety in Employment Act 1992;
 - Resource Management Act 1991;
 - Territorial authority and/or regional council (TA/RC) requirements;
 - Guidelines for the Provision of Safety, Health and Accommodation in Agriculture* (Wellington: Department of Labour, 1996); and
 - Approved Code of Practice for Excavation and Shafts for Foundations* (Wellington: Department of Labour, 1995); both available from <http://www.osh.govt.nz/order/catalogue;>
 - Operator Safety Manual for Earthmoving Machinery*, 2006, Connexis Infrastructure ITO;
 - Manufacturer's instructions.

Any legislation or other requirement superseding any of the above will apply, pending review of this unit standard.
- 3 Assessment against this unit standard must be based on evidence from a workplace context.
- 4 Where applicable, personal protective equipment, appropriate for the work being carried out, is to be selected and worn in accordance with company requirements and manufacturer's instructions.
- 5 Definitions
 - Company requirements* refer to all policies, procedures, and methodologies the candidate's organisation has in place including but not limited to those relating to health, safety, environment, quality, and operations.
 - Manufacturer's instructions* may include specifications, installation, handling, use, and maintenance instructions and safety data sheets.

Outcomes and performance criteria

Outcome 1

Select equipment, machinery, and materials for the installation operation.

Performance criteria

- 1.1 Equipment, machinery, and hand tools chosen are appropriate for the work to be carried out.
- Range machinery – excavator, trencher, or tractor;
equipment – mole plough or backfill blade.
- 1.2 Materials selected meet volume, working pressure, and working head standards in accordance with system plan.
- Range includes but is not limited to – pipes, joints, troughs, tanks, pumps.

Outcome 2

Install the water reticulation system.

Performance criteria

- 2.1 Excavation is to predetermined alignment, depth, width, and level in accordance with the system plan.
- 2.2 Pipes are laid and connected in accordance with the system plan.
- 2.3 The pump system is installed in accordance with the system plan.
- 2.4 Troughs and tanks are placed on level sites in accordance with the system plan.
- 2.5 Site is reinstated in accordance with client requirements.

Outcome 3

Carry out post-operational procedures.

Performance criteria

- 3.1 Shut-down procedures are carried out in accordance with manufacturer's instructions.
- 3.2 Equipment is cleaned and, as required, treated in accordance with manufacturer's instructions and/or company requirements.
- 3.3 Lubrication is carried out in accordance with manufacturer's instructions.

- 3.4 Any damage or faults including any missing, bent, broken, or loose parts are identified and are repaired, replaced, or reported in accordance with manufacturer's instructions and/or company requirements.
- 3.5 Equipment and machinery are stored in accordance with company requirements.
- 3.6 Documentation for the operation is completed in accordance with company and client requirements, and is stored in accordance with company requirements.

Replacement information	This unit standard replaced unit standard 6262.
--------------------------------	---

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.
