Guidance Information

1 Definitions

Industry practice refers to the ability to work unsupervised, demonstrating knowledge and skills that reflect the productivity, uniformity, finish quality and material economies currently accepted within industry.

Plant is used as in the Health and Safety at Work Act 2015 to mean appliances, equipment, fittings, furniture, implements, machines, machinery, tools, vehicles, plus parts, controls, and anything connected.

Site documents refer to any official documentation for the site, and may include consents, working drawings, plans and specifications, reports, producer statements, any relevant industry standards, or any other documentation critical to the construction process.

Work site practice refers to the documented procedures specific to a work site which set out the standard and required practices of that work site.

2 For all *on site* unit standards the practical assessment evidence must be provided in the context of commercial business construction operations, in the workplace, under normal workplace conditions.

3 Credit for this unit standard indicates compliance with industry practice.

4 Legislation and publications relevant to this unit standard include:

Health and Safety at Work Act 2015 and Health and Safety in Employment Regulations 1995;

Building Act 2004;

Resource Management Act 1991;

New Zealand Building Code;

available from <https://www.legislation.govt.nz/>

National Association of Steel-Framed Housing (NASH) Standard Part 2:2019 Light Steel Framed Buildings available from <https://nashnz.org.nz/>.
