

Title	Carry out a lactose milling process in a dairy processing operation		
Level	4	Credits	5

Purpose	People credited with this unit standard are able to: describe the lactose milling process; prepare to operate a lactose milling process; and operate and monitor a lactose milling process, in a dairy processing operation.
----------------	--

Classification	Dairy Processing > Milk Products
-----------------------	----------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Legislation and regulations relevant to this unit standard include but are not limited to:
 - Health and Safety at Work Act 2015;
 - Health and Safety in Employment Regulations 1995;
 - Animal Products Act 1999;
 - Animal Products (Dairy) Regulations 2005; and any subsequent amendments.
- 2 All evidence presented in this unit standard must be in accordance with:
 - organisational requirements.
- 3 Definitions

Control points – refer to those key points in a work process which must be monitored and controlled. This includes food safety (critical), quality and regulatory control points as well as inspection points.

Lactose processing equipment – refers to grinding mills, sieves, conveyors and pumping systems, evaporators, crystallisation tanks, decanting plant, driers.

Materials – refer to lactose and additives or other agents as required, consistent with the provisions of the Australian and New Zealand Food Standards Code available on website www.foodstandards.gov.au.

Organisational requirements – instructions to staff on policies and procedures which are documented in memo, electronic or manual format and are available in the workplace. These include but are not limited to site-specific and company standard operating procedures, food safety and quality management requirements.

Outcomes and performance criteria

Outcome 1

Describe the lactose milling process in a dairy processing operation.

Performance criteria

- 1.1 Describe the purpose of the lactose milling process in terms of basic principles.
- 1.2 Describe the stages and changes which occur during lactose milling in terms of the effects of process stages on the end product.
- 1.3 Describe material/s preparation requirements for lactose milling in terms of the effect on the milling process.
- 1.4 Describe the main methods used to mill lactose in terms of the variables in the process.
- Range variables include but are not limited to – plant specifications, raw materials.
- 1.5 Describe methods of monitoring control points and maintaining control of the process in terms of the common causes of variation and corrective action required.
- Range methods may include but are not limited to – process specifications, procedures, operating parameters, equipment and instrumentation components, materials and services, sampling and testing, recording requirements; evidence of three methods is required.
- 1.6 Describe shutdown, cleaning and sanitation requirements in terms of the changeover process and different types of shutdowns.
- 1.7 Describe safety issues related to the lactose milling process.
- Range safety issues include but are not limited to – health and safety hazards and controls, lockout and tag procedures, environmental protection and controls.

Outcome 2

Prepare to operate a lactose milling process in a dairy processing operation.

Performance criteria

- 2.1 Identify production requirements for milling.
- 2.2 Confirm materials and services necessary to a lactose milling process are available to meet production requirements.
- 2.3 Check milling equipment to confirm status, condition and readiness for use.
- 2.4 Set the milling process to meet production outputs.

Outcome 3

Operate and monitor a lactose milling process in a dairy processing operation.

Performance criteria

3.1 Start up a lactose milling process.

3.2 Monitor lactose milling equipment, product and control points to confirm that they meet production requirements.

Range monitoring may include but is not limited to – monitoring control points and parameters, adjusting operating parameters, plant checks, identifying sampling and testing requirements, taking samples, handling samples, dispatch of samples, conducting tests; evidence of three monitoring examples is required.

3.3 Identify, rectify and/or report any out-of-specification product, process and equipment performance.

3.4 Clean and sanitise lactose milling equipment.

3.5 Collect, treat and dispose of or store waste for recycling.

3.6 Record workplace information related to operating monitoring a lactose milling process.

3.7 Shut down lactose milling equipment.

Range shut down includes but is not limited to – putting plant on standby, routine, emergency situation.

Planned review date	31 December 2025
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	27 July 2005	31 December 2016
Rollover	2	17 July 2009	31 December 2016
Review	3	16 July 2015	31 December 2024
Review	4	27 May 2021	N/A
Revision	5	26 January 2023	N/A

Consent and Moderation Requirements (CMR) reference	0022
