

Title	Dismantle, inspect, assemble, and test firearms under supervision		
Level	3	Credits	35

Purpose	People credited with this unit standard are able to dismantle and clean, inspect and replace faulty parts, and assemble and test firearms under supervision.
----------------	--

Classification	Mechanical Engineering > Gunsmithing
-----------------------	--------------------------------------

Available grade	Achieved
------------------------	----------

Entry information	
Critical health and safety prerequisites	Must hold a current New Zealand firearm licence and endorsements. Prerequisites: Unit 2395, <i>Select, use and care for, engineering hand tools</i> ; and Unit 21912, <i>Apply safe working practices on an engineering worksite</i> , or demonstrate equivalent knowledge and skills.

Explanatory notes

- 1 Persons possessing or working on firearms must comply with the licensing laws in accordance with the Arms Act 1983 and the Arms Regulations 1992.
- 2 Legislation
Arms Act 1983.
Arms Regulations 1992.
Conservation Act 1987.
Customs and Excise Act 1996.
Hazardous Substances and New Organisms Act 1996.
Health and Safety at Work Act 2015.
New Zealand Arms Code. Wellington: New Zealand Police. Available at <http://www.police.govt.nz/about-us/publication/arms-code>.
- 3 Definitions
Accepted industry practice refers to approved codes of practice and standardised procedures accepted by the wider mechanical engineering industry sectors as examples of best practice.
Firearm is as defined by The Arms Act 1983.
Workplace procedures refer to procedures used by the organisation carrying out the work and applicable to the tasks being carried out. They may include but are not limited to – standard operating procedures, safety procedures, equipment operating procedures, drawings, job specifications, job breakdowns, assembly instructions, test

procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.

4 Range

Types of firearms – air rifle or pistol (compressed air or gas), bolt action, break open, lever action; muzzle loading, pump action, slide action, revolver, self-loading (sporting, target, military, or police styles). Evidence of four different types of firearms is required.

5 Assessment information

- a Assessment may require work on firearms for which limited information, tools, and resources exist.
- b All activities must comply with applicable workplace procedures and must be consistent with accepted industry practice.

Outcomes and evidence requirements

Outcome 1

Dismantle and clean firearms under supervision.

Evidence requirements

- 1.1 Supporting overhaul data for firearms, where available, are obtained in accordance with workplace procedures.
- 1.2 Methods and procedures for disassembly are identified and verified with supervisor.
- 1.3 Tools to be used for disassembly of firearm are selected in accordance with workplace procedures.
- 1.4 Firearms are dismantled in accordance with workplace procedures and verified with supervisor.
- 1.5 Parts are cleaned and toxic materials handled in accordance with workplace procedures.

Range methods – hand, spray, immersion.

Outcome 2

Inspect firearms and replace faulty parts under supervision.

Evidence requirements

- 2.1 Firearm parts are inspected for conformance to manufacturer's overhaul requirements and verified with supervisor.

Range includes non-destructive testing but not ultrasonics or x-ray.
- 2.2 Faulty parts are replaced, in accordance with workplace procedures.

Outcome 3

Assemble and test firearms under supervision.

Evidence requirements

- 3.1 Firearms are assembled in accordance with workplace procedures and checked with supervisor.
- 3.2 Firearms are tested, to manufacturer's specifications when available, in accordance with legislative requirements and workplace procedures, and verified with supervisor.
- 3.3 Firearm records are completed in accordance with legislative requirements and workplace procedures.

Planned review date	31 December 2021
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	23 April 2007	31 December 2017
Review	2	15 September 2016	N/A

Consent and Moderation Requirements (CMR) reference	0013
--	------

This CMR can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Please note

Providers must be granted consent to assess against standards (accredited) by NZQA, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Requirements for consent to assess and an outline of the moderation system that applies to this standard are outlined in the Consent and Moderation Requirements (CMRs). The CMR also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
