

Title	Operate a water truck safely for surface work at an extractive site		
Level	3	Credits	6

Purpose	<p>This unit standard is for people operating water trucks for surface work at an extractive site.</p> <p>People credited with this unit standard are able to, for surface work at an extractive site: describe safe work practices, environmental issues, and emergency procedures for operating a water truck; and operate a water truck to load, haul, and distribute water.</p>
----------------	---

Classification	Extractive Industries > Surface Extraction
-----------------------	--

Available grade	Achieved
------------------------	----------

Prerequisites	Unit 8922, <i>Conduct safety checks before and after equipment use at an extractive site</i> , or demonstrate equivalent knowledge and skills.
----------------------	--

Guidance Information

- Performance of the outcomes of this unit standard must comply with the following:
 - Resource Management Act 1991;
 - Health and Safety at Work Act 2015 (HSW);
 - Health and Safety at Work (General Risk and Workplace Management) Regulations 2016;
 - Health and Safety at Work (Worker Engagement, Participation, and Representation) Regulations 2016;
 - Health and Safety at Work (Mining Operations and Quarrying Operations) Regulations 2016;
 - approved codes of practice issued pursuant to the HSW Act.
- Any new, amended or replacement Acts, regulations, standards, codes of practice, guidelines, or authority requirements or conditions affecting this unit standard will take precedence for assessment purposes, pending review of this unit standard.

3 Definitions

Company procedures mean the documented methods for performing work activities and include health and safety, operational, environmental, and quality management requirements. They may refer to legislation, regulations, guidelines, standard operating procedures, manuals, codes of practice, or policy statements.

Dry means the surface is dry to touch and no rain falls during the task.

Industry best practice may be documented in management plans, control plans, company procedures, managers' rules, occupational health and safety policy, industry guidelines, codes of practice, manufacturers' instructions, and safe working and/or job procedures (or equivalent).

Wet means it has been raining for more than one hour before starting and is still raining during and on completion of the task.

4 Personal protective equipment must be used throughout operations in accordance with industry best practice and/or company procedures.

5 Assessment against this unit standard must be based on evidence from an extractives industry site.

6 It is recommended that people seeking credit for this unit standard first hold the class of driver licence required for the vehicle being driven.

Outcomes and performance criteria**Outcome 1**

Describe safe work practices, environmental issues, and emergency procedures for operating a water truck at an extractive site.

Performance criteria

1.1 Safe work practices for water truck operation are described in accordance with industry best practice and/or company procedures.

Range includes but is not limited to – vehicle interactions, pedestrians, edge protection, overhead lines.

1.2 Emergency procedures for operating a water truck are described in accordance with industry best practice and/or company procedures.

Range operation and maintenance manuals (safety section), warning systems, isolating systems, extinguishers, site safety plan; may include – two-way radio procedures.

1.3 Environmental issues related to the work site are described in terms of impact of water truck operations.

1.4 The methods for controlling and monitoring adverse effects on the environment during water truck operations are described in accordance with legislative requirements, industry best practice, and/or company procedures.

Outcome 2

Operate a water truck to load, haul, and distribute water for surface work at an extractive site.

Range wet or dry conditions, day or night shift;
may include – use of two-way radios.

Performance criteria

2.1 Pre-start checks are carried out in accordance with industry best practice, company procedures, and/or manufacturer's instructions.

Range includes – walk-around inspection, fuel, lubricants, water levels, hydraulic fluid level;
may include but is not limited to – cleanliness of windows, battery isolated, machine not tagged out, seatbelt.

2.2 The water truck is mounted and dismounted in accordance with the principle of three points of contact.

2.3 Post-start checks are carried out in accordance with industry best practice, company procedures, and/or manufacturer's instructions.

Range includes but is not limited to – warning systems, brakes, steering, lights, leaks, gauges, operating controls.

2.4 Identified health and safety hazards are controlled and monitored in accordance with legislative requirements and company procedures.

2.5 The water truck is operated within vehicle limitations in accordance with industry best practice and/or company procedures.

Range may include – operating on inclines.

2.6 Water is loaded at the filling point, hauled, and distributed in accordance with industry best practice and/or company procedures.

Range dismounting truck, slosh, water run on slopes;
surfaces may include but are not limited to – haul roads, formed and/or prepared roads, access roads, pads, stockpile, dumps, bunding, benches, batters.

2.7 Water distribution is carried out in accordance with the operating capacities of the equipment and company procedures.

Range may include but is not limited to – priority areas, spray patterns, flow rates, use of water cannons.

2.8 Water truck is parked, shut down, and maintained in accordance with industry best practice, and company procedures and/or manufacturer's instructions.

2.9 Documentation is completed in accordance with company procedures.

Planned review date	31 December 2022
