----------------	--

Classification	Resource Recovery > Resource Recovery Theory
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

None.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of preparing non-hazardous recyclables for transport.

Performance criteria

- 1.1 Requirements for the wrapping of individual recyclable items are identified and procedures are explained in relation to protection for handlers and protection for the item to be transported.

Range wrapping – material, seal;
recyclable items may include but are not limited to – glass, crockery, furniture, electrical goods, items with sharp edges, items with scratchable surface;
evidence is required of four items.

- 1.2 Packaging and strapping requirements for multiple items are identified and explained in relation to size, weight, and lifting methods.

Range packaging – bag, box, pallet, bale;
strapping – material, tension;
lifting methods – manual, mechanical.

- 1.3 Requirements for ensuring the stability of items in transit are identified, and procedures explained in relation to types of recyclables to be transported.

Range types include but are not limited to – fragile, wheeled objects, objects with rollers, unlevel base, rounded base, potential for surging, potential for shifting weight balance.

- 1.4 Labelling systems are described in relation to commodities, in-house procedures and client requirements.

Range commodities include but are not limited to – fragile, white goods; labelling includes but is not limited to – international symbols.

- 1.5 Stock identification and documentation methods are described in accordance with in-house requirements.

Range documentation includes but is not limited to – collection, delivery, dispatch.

- 1.6 Preparations for the transporting of recyclables by shipping container are described in relation to verification, loading, and documentation.

- 1.7 Methods for securing recyclables during transport are described in relation to commodities that may be blown away by the wind.

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	26 January 2007	31 December 2025
Rollover and Revision	2	28 March 2019	31 December 2025
Review	3	24 April 2025	31 December 2025
