

<b>Title</b>	<b>Repair aircraft radio and radar altimeter system components</b>		
<b>Level</b>	<b>4</b>	<b>Credits</b>	<b>25</b>

<b>Purpose</b>	People credited with this unit standard are able to: prepare to repair aircraft radio and radar altimeter system components; locate defects in aircraft radio and radar altimeter system components; repair aircraft radio and radar altimeter system components; test and adjust aircraft radio and radar altimeter system components; and complete the repair task.
----------------	---

<b>Classification</b>	Aeronautical Engineering > Avionic Radio Repair
-----------------------	---

<b>Available grade</b>	Achieved
------------------------	----------

---

### Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definition  
*Enterprise procedures* – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
- 3 The repair activities referred to in this unit standard are those usually carried out in a specialist bay or workshop on components that have been removed from the aircraft.
- 4 Radio and radar altimeter system components may include transmitter-receivers.

---

### Outcomes and performance criteria

#### Outcome 1

Prepare to repair aircraft radio and radar altimeter system components.

#### Performance criteria

- 1.1 Task is determined by reviewing maintenance documentation and enterprise procedures.  
  
Range confirm fault, repair, modify.

- 1.2 Work area is prepared, and resources obtained and checked for serviceability or status.

Range may include but is not limited to – publications, materials, tools, equipment, safety equipment, environmental conditions established.

- 1.3 Component identity is matched with documentation.

- 1.4 Component is prepared for repair.

Range clean, inspect, assess economics of carrying out repair.

- 1.5 Next task is determined and documented.

Range locate defects, repair, test, adjust, complete the task.

## Outcome 2

Locate defects in aircraft radio and radar altimeter system components.

### Performance criteria

- 2.1 Defects are located using troubleshooting techniques and inspection procedures appropriate to the defect indications.

- 2.2 Any defects are reported and documented.

## Outcome 3

Repair aircraft radio and radar altimeter system components.

### Performance criteria

- 3.1 Component is disassembled.

Range clean, label, preserve, segregate, store.

- 3.2 Rectification action is determined and documented.

- 3.3 Parts are procured and verified as authentic and serviceable.

Range identify, inspect.

- 3.4 Defects are rectified.

Range repair, replace, modify, adjust.

- 3.5 Component is assembled.

3.6 Inspections are obtained.

Range independent, progressive.

#### **Outcome 4**

Test and adjust aircraft radio and radar altimeter system components.

#### **Performance criteria**

4.1 Component is prepared for testing.

4.2 Component is tested and adjusted.

Range may include but is not limited to – troubleshoot, functionally test, calibrate, adjust, document adjustments and performance.

4.3 Inspections are obtained.

Range independent, progressive.

#### **Outcome 5**

Complete the repair task.

#### **Performance criteria**

5.1 Component is prepared.

Range may include but is not limited to – use, storage, transit, locking, blanking, packing, shelf-life requirement.

5.2 Resources are checked for serviceability and returned to service or storage.

Range may include but is not limited to – tools, equipment, safety equipment, publications.

5.3 Leftover parts and materials are disposed of.

Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.

5.4 Documentation is completed.

Range may include but is not limited to – labels, work cards, release notes.

5.5 Work area is left in a state that enables the next task to begin.

<b>Replacement information</b>	This unit standard replaced unit standard 3988.
