Purpose	<p>People credited with this unit standard are able to:</p> <ul style="list-style-type: none"> – complete an inspection compliance report for tube and coupler scaffolding; and – complete an inspection compliance report for proprietary scaffolding.
----------------	---

Classification	Lifting Equipment > Elementary Scaffolding
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 This unit standard has been developed for learning and assessment on-job or off-job in a simulated environment. Where supervision is required by law, the supervisor must hold the appropriate Certificate of Competence for the scaffolding work undertaken.
- 2 This unit standard is intended for use with standing and hanging scaffolding built with tube and coupler, or proprietary systems. It specifically excludes suspended scaffolding.
- 3 All tasks are to be carried out in accordance with:
 - a quality management systems;
 - b designer requirements and manufacturer operating instructions; and legislation, regulations, bylaws, Health and Safety at Work Act 2015, and Health and Safety in Employment Regulations 1995;
 - c the most up to date version of the *Good Practice Guidelines - Scaffolding in New Zealand (GPG)*, 2016 available from <https://www.worksafe.govt.nz/topic-and-industry/working-at-height/scaffolding-in-new-zealand/>; and all subsequent amendments and replacements.
- 4 **Definition**
Scaffolding is as described in the GPG and in the Health and Safety in Employment Regulations 1995.
- 5 **Training and assessment**
This unit standard must be assessed against the inspection reports for scaffolds contained in Appendix F of the GPG. To achieve competency in this unit standard, inspection reports must be completed for both tube and coupler, and proprietary scaffolding. The focus for competency is the completion of the inspection compliance report itself. This may be conducted on any appropriate scaffolding, which need not have been erected by the candidate.

Outcomes and performance criteria

Outcome 1

Complete an inspection compliance report for tube and coupler scaffolding.

Performance criteria

- 1.1 Inspect a tube and coupler scaffolding for compliance with the inspection report.
- 1.2 Complete an inspection report for a tube and coupler scaffolding.
- 1.3 Identify, record, and recommend remedial action to any non-compliant aspects.

Outcome 2

Complete an inspection compliance report for proprietary scaffolding.

Performance criteria

- 2.1 Inspect a proprietary scaffolding for compliance with the inspection report.
- 2.2 Complete an inspection report for a proprietary scaffolding.
- 2.3 Identify, record, and recommend remedial action to any non-compliant aspects.

Replacement information	This unit standard, unit standard 20855 and unit standard 20856 replaced unit standard 4200 and unit standard 4202.
