Range one freshwater and one salt water.

Performance criteria

- 1.1 The explanation includes the design and function of structures used for land-based aquaculture.
- 1.2 The explanation includes the impact of the environment on structures used for land-based aquaculture.
- 1.3 The explanation includes the impact of the structures used for land-based aquaculture on the environment.
- 1.4 The explanation includes the design and function of equipment used for land-based aquaculture.

Element 2

Prepare for repair and maintenance of equipment and structures for land-based aquaculture.

Range one of – freshwater or salt water.

Performance criteria

- 2.1 A schedule is prepared for the repair and maintenance of equipment and structures identifying the tasks or work to be done, safety and legislation requirements and the resources required.

Range resources may include but are not limited to – equipment, tools, spare parts, trades personnel, company personnel;
evidence is required for three resources.

- 2.2 The repair and maintenance schedule is distributed to relevant personnel in accordance with company requirements.
- 2.3 The resources required for the repair and maintenance are gathered and checked for serviceability so that the task or work can be carried out.

Element 3

Repair and maintain equipment and structures for land-based aquaculture.

Range one of – freshwater or salt water.

Performance criteria

- 3.1 Equipment is repaired and maintained in accordance with the repair and maintenance schedule.
- Range includes but is not limited to – corrosion, wear and tear, damage.
- 3.2 Structures are repaired and maintained in accordance with the repair and maintenance schedule.
- Range includes but is not limited to – corrosion, structural integrity, damage.
- 3.3 Licensed trades personnel are accessed where necessary in accordance with company and legislation requirements.

Element 4

Report on the repair and maintenance of equipment and structures for land-based aquaculture.

Range one of – freshwater or salt water.

Performance criteria

- 4.1 Repair and maintenance problems and progress are documented and reported in accordance with company and legislation requirements.
- 4.2 Areas for improvement in the performance of equipment and structures are identified during repair and maintenance, and recommendations are documented and reported in accordance with company requirements.

Please note

Providers must be accredited by NZQA, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by NZQA before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
