Title | Replace dynamic seals in machines and equipment
--- | ---
Level | 3
Credits | 8

Purpose
People credited with this unit standard are able to prepare for seal replacement, and replace and test dynamic seals.

Classification
Mechanical Engineering > Maintenance and Diagnostics in Mechanical Engineering

Available grade
Achieved

Entry information

Critical health and safety prerequisites
Unit 21912, *Apply safe working practices on an engineering worksite*, or demonstrate equivalent knowledge and skills.

Explanatory notes

1 Reference

2 Definition
*Industry practice* – safe and sound trade practices generally accepted by competent persons within the mechanical engineering industry.

3 Range
Dynamic seals applicable to this unit standard may include but are not limited to: lip (‘O’ ring, standard and multiple lip, cup, J, chevron); gland packings (braided, metallic, synthetic, segmented; ribbon, flat, square, round, moulded, dry, lubricated, for high/low temperature/pressure, gases, liquids, and solids application); mechanical; and labyrinth. Material types include: carbon, stellite, and neoprene. Evidence is required for the selection and replacement of at least three different seals.

Outcomes and evidence requirements

Outcome 1
Prepare for seal replacement.

Evidence requirements

1.1 Type of seal to be replaced is identified in accordance with industry practice.
1.2 Sealing principles relevant to the seal type and intended usage are described.
1.3 Tools and replacement method are determined relevant to seal assembly.

**Outcome 2**

Replace and test dynamic seals.

**Evidence requirements**

2.1 Seal assemblies are removed in accordance with industry practice.
2.2 Seal surfaces and seal assemblies are inspected for damage prior to seal fitting in accordance with industry practice.
2.3 Seals and other replacement parts are prepared in accordance with industry practice.
2.4 Seal assemblies are fitted to machine or equipment and adjusted in accordance with industry practice.
2.5 Seal assemblies are tested for performance with specification in accordance with industry practice.
2.6 Records for seal replacement are completed in accordance with industry practice.

Consent and Moderation Requirements (CMR) reference: 0013

This CMR can be accessed at http://www.nzqa.govt.nz/framework/search/index.do.

Please note

Providers must be granted consent to assess against standards (accredited) by NZQA, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Requirements for consent to assess and an outline of the moderation system that applies to this standard are outlined in the Consent and Moderation Requirements (CMR). The CMR also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
