Purpose	People credited with this unit standard are able to demonstrate knowledge of environmental requirements for the masonry industry.
----------------	-----------------------------------------------------------------------------------------------------------------------------------

Classification	Masonry > Brick and Block Laying
-----------------------	----------------------------------

Available grade	Achieved
------------------------	----------

Explanatory notes

1 Definitions

Industry practice refers to the expected standard required at the location in which credit for this standard is sought; such standards may be set down in: industry codes of practice, enterprise procedures, which refer to documented procedures specific to the enterprise which set out the standard business practice, and activities of that enterprise.

Site safety plan refers to the documented safety plan which is required by law to ensure compliance with the Health and Safety in Employment Act, 1992.

Plant refers to appliances, equipment, fittings, furniture, implements, machines, machinery, tools, vehicles, plus parts, controls, and anything connected to such plant.

- 2 Legislation relevant to this unit standard includes the following:
 Health and Safety in Employment Act 1992;
 Resource Management Act 1991.

Outcomes and evidence requirements

Outcome 1

Demonstrate knowledge of environmental requirements for the masonry industry.

Evidence requirements

- 1.1 The site safety plan is described in terms of its purpose and function.
- 1.2 The process for maintaining, cleaning and storing plant is described in accordance with manufacturers and legislative requirements.
- 1.3 The process for dealing with surplus materials is described in accordance with industry practice and legislative requirements.

- 1.4 The process for minimising dust hazards when using cutting equipment is described in accordance with industry practice and legislative requirements.
- 1.5 The process for leaving the work site in a safe, clean and tidy condition is described in accordance with industry practice.
- 1.6 The process for washing down brick and block work is described in accordance with industry practice and legislative requirements.
- 1.7 The process for dealing with waste water is described in accordance with industry practice and legislative requirements.

Planned review date	31 December 2012
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	14 December 2007	31 December 2011
Revision	2	21 July 2011	N/A

Consent and Moderation Requirements (CMR) reference	0048
------------------------------------------------------------	------

This CMR can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Please note

Providers must be granted consent to assess against standards (accredited) by NZQA, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Requirements for consent to assess and an outline of the moderation system that applies to this standard are outlined in the Consent and Moderation Requirements (CMRs). The CMR also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.

Comments on this unit standard
