### Guidance Information

- 1 All work practices must comply with:  
Health and Safety at Work Act 2015;  
The New Zealand Waste Strategy: Reducing Harm, Improving Efficiency 2010  
Ministry for the Environment, available at <http://www.mfe.govt.nz>; and job instructions.
- 2 Hazard controls, safety procedures, and personal protective equipment must be used throughout operations in accordance with company procedures.
- 3 Definitions  
*Company procedures* mean the documented methods for performing work activities and includes health and safety, environmental, and quality management requirements. They may refer to manuals, codes of practice, or policy statements.  
*Cullet* refers to recycled broken or waste glass.

---

### Outcomes and performance criteria

#### Outcome 1

Identify and sort cullet for recycling.

#### Performance criteria

- 1.1 Job requirements are confirmed in accordance with company procedures.
- 1.2 Hazards of working with glass and glass sorting equipment are identified, assessed, and controlled in accordance with company procedures and legislation.

- 1.3 Glass types are identified and sorted into containers in accordance with company procedures and job instructions.

Range sorting may be for transport or processing depending on the workplace;  
types – clear, green, amber, mixed.

- 1.4 Prohibited materials are removed from sorted glass in accordance with company procedures and job instructions.

Range materials include but are not limited to – metal, plastic, general waste.

**This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.**
