### Guidance Information

- 1 This unit standard must be assessed against on-job.
- 2 Definition  
*Long-term career goal* refers to a career goal that requires the learning of additional skills and knowledge beyond those required for the candidate's current position.

---

### Outcomes and performance criteria

#### Outcome 1

Plan own career path within the furniture manufacturing industry.

#### Performance criteria

- 1.1 One career option available within the candidate's furniture workplace is identified.
- 1.2 Career options available in the wider industry that use furniture manufacturing skills and knowledge are identified.

Range may include but is not limited to – working in furniture industry roles such as team leader, quality specialist, factory supervisor, production scheduler and/or planner, production engineer, computer numerical controlled machine programmer, furniture designer, restorer, upholsterer, furniture finisher; working in associated industries such as carpentry, joinery, marine interiors, motor homes, commercial building fitments, interior design, design engineering; evidence of three career options is required.

1.3 A long-term career goal is selected from the options identified in performance criteria 1.1 or 1.2, and skills and knowledge required for that job are described.

Range a minimum of two practical skills, and a minimum of two areas of theoretical knowledge.

1.4 A career pathway to achieve the long-term career goal selected in performance criterion 1.3 is determined.

Range identification of a minimum of one qualification that provides training relevant to the long-term career goal, description of the type of industry work experience required to learn the practical job skills, approximate timeframes required to complete the identified qualification or qualifications.
