|--------------|---|----------------|----------|
| Title | Demonstrate knowledge of, implement, and audit temporary traffic control on private forest roads | | |
| Level | 3 | Credits | 5 |

| | |
|----------------|---|
| Purpose | People credited with this unit standard are able to: demonstrate knowledge of the purpose and stages of, and responsibilities for, temporary traffic control on private forest roads; demonstrate knowledge of the signs, banners, tapes, and barriers used in temporary traffic control on private forest roads; demonstrate knowledge of the planning steps and types of temporary traffic control required on private forest roads; and implement temporary traffic control on private forest roads. |
|----------------|---|

| | |
|-----------------------|------------------------------|
| Classification | Forestry > Forest Operations |
|-----------------------|------------------------------|

| | |
|------------------------|----------|
| Available grade | Achieved |
|------------------------|----------|

Guidance Information

- 1 Legislation relevant to this unit standard includes the Health and Safety at Work (HSW) Act 2015; the Resource Management (National Environmental Standards for Plantation Forestry) Amendment Regulations 2018; and any subsequent amendments.
- 2 References
Approved Code of Practice (ACOP) for Safety and Health in Forestry Operations, December 2012, available from <https://worksafe.govt.nz/>.
New Zealand Forest Owners Association, *Forest Practice Guides* (2019), and any subsequent amendments, available from <https://www.nzfoa.org.nz>.
- 3 Definitions
Accepted industry practice refers to approved codes of practice and standardised procedures accepted by the wider forestry industry as examples of best practice.
Forest refers to the actual forest; a large area of land covered with trees.
Private Forest Road refers to a forest road that is not administered by the NZ Transport Agency or a territorial authority.
- 4 Assessment information
This unit standard must be assessed on-job.
All activities and evidence must meet worksite procedures and accepted industry practice.

- 5 People credited with this unit standard have met the skills and knowledge requirements for the role of a Site Traffic Co-ordinator for forest operations on private forest roads.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of the purpose and stages of, and responsibilities for, temporary traffic control on private forest roads.

Performance criteria

- 1.1 The purpose of temporary traffic control is explained.
- 1.2 The three stages of the temporary traffic control process are explained.
- 1.3 The three areas of responsibility for temporary traffic control are explained.
- 1.4 The responsibilities of a Site Traffic Co-ordinator are described.

Outcome 2

Demonstrate knowledge of the signs, banners, tapes, and barriers used in temporary traffic control on private forest roads.

Performance criteria

- 2.1 Signs used in temporary traffic control are identified and their use is explained.

| | |
|-------|--|
| Range | four each of – advance warning signs, direction and/or protection signs. |
|-------|--|
- 2.2 The use of banners, tapes, and barriers is explained.
- 2.3 Three mandatory requirements for banners, tapes, and barriers are identified.

Outcome 3

Demonstrate knowledge of the planning steps and types of temporary traffic control required on private forest roads.

Performance criteria

- 3.1 The planning steps for temporary traffic control are identified and explained.
- 3.2 The type of temporary traffic control required for different activities affecting forest operations is described.

| | |
|-------|---|
| Range | evidence relating to at least three different activities affecting forest operations is required. |
|-------|---|

3.3 The importance of reviewing the temporary traffic control plan prior to sign set-out is explained.

3.4 The aim of a temporary traffic control audit is explained.

Outcome 4

Implement temporary traffic control on private forest roads.

Range evidence relating to at least two different forest operations is required.

Performance criteria

4.1 The type of temporary traffic control required for the forest operation is determined.

4.2 The steps to plan and implement temporary traffic control relevant to the role of a Site Traffic Co-ordinator are completed.
