Title | Open and close aircraft cargo doors
---|---
Level | 3
Credits | 2

**Purpose**
People credited with this unit standard are able to: demonstrate knowledge of hazards involved in operating aircraft cargo doors; open an aircraft cargo door; and close an aircraft cargo door.

**Classification**
Aviation > Ramp Operations

**Available grade**
Achieved

**Guidance Information**

1. All tasks are to be carried out in accordance with enterprise procedures, the enterprise being the organisation carrying out the work. Enterprise procedures referred to in this unit standard are the applicable procedures found in the following: enterprise exposition; manufacturer publications; Government and local body legislation; airworthiness authority requirements.

2. Ramp staff should be aware that the method for opening and closing an aircraft cargo door differs between aircraft models.

**Outcomes and performance criteria**

**Outcome 1**
Demonstrate knowledge of hazards involved in operating aircraft cargo doors.

**Performance criteria**

1.1 Hazards involved in operating an aircraft cargo door are described.

   Range may include but is not limited to – threat of being crushed, being struck by moving objects or aircraft propeller, jet blast, engine ingestion, pinching, falling from height, being cut by sharp edges; door orientation and/or movement.

**Outcome 2**
Open an aircraft cargo door.

**Performance criteria**

2.1 Precautionary measures are undertaken to prevent damage to the aircraft.
2.2 Aircraft cargo door is prepared for opening in accordance with aircraft type.

Range may include but is not limited to – commands or instructions from pilot or other personnel, authorisation from Police, Customs or Quarantine authority.

2.3 Aircraft cargo door is opened in accordance with aircraft type.

Range partially to release from door frame, fully before securing.

2.4 Aircraft cargo door is secured in accordance with aircraft type.

**Outcome 3**

Close an aircraft cargo door.

**Performance criteria**

3.1 Aircraft cargo door is prepared for closure in accordance with aircraft type.

Range may include but is not limited to – check for damage to door seals, damage to door mechanism; ensure no obstructions to door closure such as nets, straps, FOD; ensure sill latches are set if applicable.

3.2 Aircraft cargo door is closed and secured in accordance with aircraft type.

3.3 State of aircraft cargo door is checked and confirmed.

Range may include but is not limited to – scratching or denting of surrounding aircraft structure, damage to airside equipment.
