Title	Produce a work schedule and resourcing plan for a composite component project		
Level	4	Credits	5

Purpose	People credited with this unit standard are able to produce a work schedule and a resourcing plan for a composite component project.
---------	--

Classification	Composites > Industrial Composites	
Available grade	Achieved	

### **Guidance Information**

1 Definition

*Product specifications* refer to the documented requirements of the manufactured item.

- 2 Competence must be demonstrated on a component that does not already have a work schedule and resourcing plan that the candidate is familiar with.
- 3 Component size or complexity this unit standard is expected to be generally used for simple components. The work schedule and resourcing plan applies only to the structure, resourcing and work packages. Systems are not included although time allowances may be made for their installation.

# Outcomes and performance criteria

## Outcome 1

Produce a work schedule for a composite component project.

## **Performance criteria**

1.1 Breakdown schedule of work required is developed and documented in accordance with, and by reference to, plans and specifications.

Range milestones, timeline.

- 1.2 Processes required to do the work are developed and documented in accordance with plans and specifications.
- 1.3 Quality of finished product is specified and documented to meet product specifications.

# Outcome 2

Produce a resourcing plan for a composite component project.

## Performance criteria

2.1 Resources are allocated to the project in accordance with project requirements.

Range resources include – human, equipment, machinery, hand power tools, materials.
