

Title	Operate and maintain equipment to measure pressure in a civil engineering laboratory		
Level	3	Credits	3

Purpose	People credited with this unit standard are able to operate and maintain equipment to measure pressure in a civil engineering laboratory.
----------------	---

Classification	Infrastructure Civil Engineering > Infrastructure Laboratory
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable organisational and legislative requirements.
- 2 Applicable legislation, regulations, rules, standards and codes include but are not limited to the: Health and Safety at Work Act 2015, Hazardous Substances and New Organisms Act 1996, and their associated regulations and subsequent amendments; ISO/IEC 17025:2018 *General requirements for the competence of testing and calibration laboratories*, available from <https://www.iso.org/store.html>; NZS 4402.1:1986 *Methods of testing soils for civil engineering purposes - Preliminary and general*, available from <https://www.standards.govt.nz/>.
- 3 Definition
Organisational requirements refer to instructions to staff on policy and procedures which are formally documented or generally accepted at the worksite. This may include legislation; industry standards and methods; national and international standards and methods; standard operating procedures; specifications; manuals; and manufacturer's information.

Outcomes and performance criteria

Outcome 1

Operate and maintain equipment to measure pressure in a civil engineering laboratory.

Range mechanical, liquid, electronic.

Performance criteria

1.1 Equipment is selected in accordance with sample requirements and method.

Range includes but is not limited to – range, precision, units, type.

1.2 Equipment is checked before use.

Range may include but is not limited to – condition, environmental conditions, safety equipment, calibration status.

1.3 Pressure is measured.

Range may include but is not limited to – stable reading, parallax errors, temperature, barometric correction.

1.4 Results are recorded.

Range results may include but are not limited to – pressure, temperature, humidity, date, time, operator.

1.5 Equipment is cleaned and maintained.

Planned review date	31 December 2024
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	21 January 2011	31 December 2021
Review	2	23 January 2020	N/A

Consent and Moderation Requirements (CMR) reference	0101
--	------
