Explanatory notes

- 1 Definitions
Specifications refer to documented specifications and may include any of the following: drawings, project or job requirements, manufacturers' specifications, recommendations or instructions, material specifications.
Workplace practice refers to the documented procedures specific to a workplace which set out the standard and required practices of that workplace.
- 2 Evidence for this unit standard must comply with industry practice. *Industry practice* refers to the ability to demonstrate knowledge and skills that reflect the productivity, uniformity, finish quality and material economies currently accepted within industry.
- 3 Legislation and publications relevant to this unit standard include: Health and Safety in Employment Act 1992 and Health and Safety in Employment Regulations 1995; AS/NZS 4058:2007 *Precast concrete pipes (pressure and non-pressure)*, available from Standards New Zealand (<http://www.standards.co.nz>).

Outcomes and evidence requirements

Outcome 1

Prepare to produce precast concrete pipes.

Evidence requirements

- 1.1 Job requirements are determined from specifications.
- 1.2 Mould is checked and confirmed as ready to start in accordance with specifications.

 Range reinforcing, cover, clearance.

- 1.3 Mould is moved to manufacturing area without damage and checked to ensure safety during manufacturing.

Outcome 2

Produce precast concrete pipes.

Evidence requirements

- 2.1 Mould is filled with concrete to the specified level, in accordance with specifications and workplace practice.
- 2.2 Concrete is compacted within mould in accordance with workplace practice.
- 2.3 Production process is monitored to ensure product conforms to specifications, and any required actions to maintain tolerances are taken, in accordance with workplace practice.
- 2.4 Any required trowelling of product surface is performed in accordance with workplace practice.
- 2.5 Pipe is checked and any processing faults are identified and rectified in accordance with workplace practice.
- 2.6 Pipe is prepared for curing in accordance with workplace practice.

Outcome 3

Complete work operations.

Evidence requirements

- 3.1 All operations are safely completed, workplace and equipment are cleaned in accordance with workplace practice and environmental safety requirements, and routine maintenance is carried out in accordance with workplace practice.
- 3.2 All documentation is completed in accordance with workplace practice.

Accreditation and Moderation Action Plan (AMAP) reference	0048
--	------

This AMAP can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Please note

Providers must be granted consent to assess against standards (accredited) by NZQA, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Consent requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.

Comments on this unit standard
