---

### Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definition  
*Enterprise procedures* – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
- 3 The scope of the system that this standard relates to is described in ATA iSpec 2200, chapters 22, 23, 24, 26, 31, 33, 34, and 35.

---

### Outcomes and performance criteria

#### Outcome 1

Apply troubleshooting techniques to locate avionic defects in aeronautical engineering.

#### Performance criteria

- 1.1 Avionic defects are located using troubleshooting techniques.
 

Range	troubleshooting techniques may include but are not limited to – visual inspections, half-split rule, troubleshooting charts, interpretation of component and/or system circuit diagrams.
-------	--
- 1.2 Defects are located and reported using knowledge of avionic equipment, system and component operation.
 

Range	may include but is not limited to – leaks, chafing, dents, gouges, binding, restrictions, obstructions.
-------	---

1.3 Avionic defects are assessed to determine action.

Range may include but is not limited to – repair, replace, scrap.

<b>Planned review date</b>	31 December 2024
----------------------------	------------------

#### Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	19 September 2013	31 December 2021
Review	2	26 March 2020	N/A

<b>Consent and Moderation Requirements (CMR) reference</b>	0028
