Title	Visually inspect aircraft composite structures		
Level	4	Credits	5

Classification	Aeronautical Engineering > Aircraft Structures
Classification	Aeronautical Engineening > Airorait Structures

Available grade	Achieved
-----------------	----------

Guidance Information

1 All tasks must be carried out in accordance with enterprise procedures.

2 Definition

Enterprise procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.

- 3 Structures may include composite structures, main frames, auxiliary structures, plates or skin, attached fittings, aerodynamic fairings, flight control surfaces, doors, rigid integral fuel tanks.
- 4 Structural components do not need to be removed from the aircraft to meet the performance criteria of this unit standard.

Outcomes and performance criteria

Outcome 1

Prepare to carry out visual inspections of aircraft composite structures.

Performance criteria

- 1.1 Inspection requirements are determined by reviewing maintenance documentation and enterprise procedures.
- 1.2 Work area is prepared, and resources are obtained and checked.

Range may include but is not limited to – publications, cleaning materials, tools, safety equipment, illumination, magnifying glass, mirror.

1.3 Structural area to be inspected is cleaned.

Outcome 2

Visually inspect aircraft composite structures.

Performance criteria

- 2.1 Structures are visually inspected.
- 2.2 Defects are located and identified.

Range may include but is not limited to – cracking, corrosion, distortion,

leaks, fretting, stress, scoring, loose fasteners, damage to

protective finish, wear delamination.

2.3 Aircraft is inspected after an abnormal occurrence.

Range may include but is not limited to – heavy landing, bird strike,

lightning strike, extreme turbulence, foreign object damage,

corrosive substance spillage, flap down overspeed;

evidence is required for a minimum of three types of occurrence.

- 2.4 Any defects found during inspection are reported and documented.
- 2.5 Documentation is completed.

Replacement information	This unit standard and unit standard 28140 replaced unit standard 4074.
