- 2 Definitions

Assessment refers to the candidate instructor's assessment of a group of divers applying industry technical and safety criteria. A group is considered to be a minimum of two people.

Confined water refers to a dive site at which the environment is predictable and controlled and includes clear visibility, a calm surface with an absence of strong current, with easy entry and exit points.

Clients refer to individuals who are certified as open water divers.

Dive plan refers to the procedures by which the accredited dive provider's diving operations are implemented for all dives required to meet this standard.

Industry technical and safety criteria refer to dive instruction, supervision and performance being carried out in accordance with the standards, procedures and training materials of the respective dive training agency. The agency must meet or exceed the World Recreational Scuba Training Council training standards.

Instruction refers to the candidate instructor's act of imparting knowledge or skills as per industry technical and safety criteria.

Open water is any natural body of water realistic of local diving conditions in terms of water movement, temperature, visibility, depth and aquatic life.
