

Design women's structured jackets

Level 4

Credits 6

Purpose People credited with this unit standard are able to select an existing pattern block and create a new style, and produce final garment patterns and product specifications for women's structured jackets.

Subfield Clothing Manufacture

Domain Apparel Design and Patternmaking

Status Registered

Status date 19 June 2009

Date version published 19 June 2009

Planned review date 31 December 2015

Entry information Open.

Accreditation Evaluation of documentation and visit by NZQA and industry.

Standard setting body (SSB) Competenz

Accreditation and Moderation Action Plan (AMAP) reference 0030

This AMAP can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Special notes

- 1 This unit standard is for tailors and fashion designers.
- 2 It is recommended that people already have a knowledge of fabric characteristics and behaviour, garment construction, and underpinning knowledge of specification requirements for operation sequence and machinery requirements.
- 3 Range
design features can include – peplums, flounces, piping, braiding, flaps, pockets, welts, buttons, buttonholes, belts, half belts, epaulettes.
- 4 The unit standard is for candidates converting a given design brief as opposed to creating the design themselves.

- 5 Performance of the elements must comply with the Health and Safety in Employment Act 1992.
- 6 Definitions
- Workplace procedures* refer to the verbal or documented procedures for performing work activities and include health and safety, operational, environmental, and quality management requirements. They may refer to manuals, manufacturer's specifications, codes of practice, or policy statements.
- Product, style or garment specifications* are all terms for the same document. The terminology varies between workplaces but they all refer to the documentation that accompanies each manufacturing order. This documentation sets out the material to be used for the garment, the size range for manufacturing, the product assembly sequence, product finishing procedures and the component specifications.
- Design brief* refers to the instructions for the garment design. This may be written or verbal instructions, a picture, a photo, a sample garment or a modification to an existing style.
- Structured garments* or parts of garments may have lining, fusing, boning, wiring or shoulder pads and usually have complex methods of construction.
- Unstructured garments* require no additional support to the fabric and have less complex methods of construction.

Elements and performance criteria

Element 1

Select an existing pattern block and create a new style.

Performance criteria

- 1.1 Selected pattern block meets the design brief.
- 1.2 Design lines and bust darts incorporated into the block meet the design brief.
- 1.3 Repositioned side seam lines meet the design brief.
- 1.4 Panel lines meet the design brief.
- 1.5 Vents and pleats incorporated into the block meet the design brief.
- 1.6 Lapels, collars, and sleeves are adjusted to meet the design brief.
- 1.7 Design features and trims are incorporated to meet the design brief.

Element 2

Produce final garment patterns and product specifications for women's structured jackets.

Performance criteria

- 2.1 Pattern pieces are complete and meet the design brief.

- 2.2 Style and diagrammatic sketches meet the design brief.
- 2.3 Manufacturing style specifications are complete and in accordance with workplace procedures.
- Range fabrics, interlinings, linings, trims.
- 2.4 Documentation is completed in accordance with workplace procedures.

Please note

Providers must be accredited by NZQA, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by NZQA before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
