### Explanatory notes

- 1 Definitions
 

*Distribution facility* refers to a workplace where the primary focus is on storage and distribution of stock.

*Organisational procedures* referred to in this unit standard may include but are not limited to the applicable procedures found in the following: organisational performance guidelines and standards; manufacturer's procedures and specifications; Government and local body legislation.
- 2 Monitor and maintain in the context of this unit standard means to have an influence on the successful operation of a functional area or team without necessarily any formal line reporting authority. It covers the responsibility of a team member to support and possibly guide their colleagues to ensure collective outcomes are met. It would involve being watchful for potential or actual issues or problems and taking some responsibility for ensuring they are addressed in line with establishment requirements.
- 3 Any relevant Acts, regulations, and bylaws must be complied with during assessment against this standard.
- 4 Evidence for the practical components of this unit standard must be gathered in the workplace.
- 5 Performance of the evidence requirements of this unit standard must comply with organisational procedures.

---

## Outcomes and evidence requirements

### Outcome 1

Monitor and maintain a stock planning system in a distribution facility.

#### Evidence requirements

- 1.1 The provision of required storage is monitored and maintained.
- Range requirements include but are not limited to – goods inward, storage, goods outward.
- 1.2 Forecast stock demands and supply options are checked and verified to establish stock requirements.
- Range stock demands may include but are not limited to – fast moving goods, seasonal goods, stock rotation.
- 1.3 Stock holding requirements are monitored and maintained.
- 1.4 Resources required to meet productivity and throughput targets are monitored and maintained.
- Range resources may include but are not limited to – people, equipment, machinery.

### Outcome 2

Monitor and maintain the management of risk in a distribution facility.

#### Evidence requirements

- 2.1 Any risks to a distribution facility are identified and recorded.
- 2.2 Risks are assessed and evaluated, and an action plan is devised and presented for approval.
- 2.3 The application of risk management procedures is supervised.
- Range risk management procedures may include but are not limited to – staff training, health and safety policies, security measures, use of surveillance equipment, surveillance procedures, loss prevention policies and procedures.
- 2.4 Any issues arising from the application of risk management procedures are identified and reported.

<b>Planned review date</b>	31 December 2021

This CMR can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

#### Please note

Providers must be granted consent to assess against standards (accredited) by NZQA, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Requirements for consent to assess and an outline of the moderation system that applies to this standard are outlined in the Consent and Moderation Requirements (CMR). The CMR also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
