Explanatory notes

- 1 Assessment must be conducted in the context of a real or realistic business entity, and in light of the requirements of that entity. A *business entity* can be an organisation, or a commercial or other enterprise, not necessarily for profit, and can be a discretely managed business unit within a larger organisation.

The requirements of the entity refers to how the entity is organised, how it operates, and how it meets its objectives. The requirements must include meeting the requirements of all relevant legislation and will address such areas as the entity's:

- purpose and goals/objectives,
- future development,
- external operating environment,
- internal processes, accountabilities, and relationships.

The requirements of the entity provide evidence for this unit standard.

The entity/entities must be sufficiently complex to enable demonstration of the full range of competence for achievement of the outcome and to meet the criteria for level 5 in the NZQF Level Descriptors, which are available at www.nzqa.govt.nz.

- 2 People, affective, and cognitive skills have been included in this standard as evidence requirements. These skills must not be addressed separately, but as part of an integrated assessment with the technical skills.
