

Title	Collaborate within a project team in the marine or composite industry		
Level	4	Credits	5

Purpose	People credited with this unit standard are able to collaborate within a project team in the marine or composite industry; and evaluate the action plan in relation to the completion of the project.
----------------	---

Classification	Boating Industries > Boatbuilding
-----------------------	-----------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

1 Definitions

Action plan refers to a planned steps or task, or a process for a specific project that will be completed over a set period of time to achieve a particular objective.

Collaborate refers to two or more people working together by sharing and thinking valuable ideas towards the accomplishment of a common objective.

Project team refers to a group of individuals responsible for carrying out the plan in relation to the project.

2 Assessment information

Collaboration within the team is expected to meet team members' and company expectations for personal and team behaviour.

For the purposes of assessment, the project should be based on marine or composite activities, processes, or multi-step tasks that have to be completed over a set period of time, such as installation of pipework in a boat, a boat construction project, production of a cored laminate product, or a bisphenol resin product. It is expected that the team will successfully complete the project.

Outcomes and performance criteria

Outcome 1

Collaborate within a project team in the marine or composite industry.

Performance criteria

- 1.1 Purpose of the team and agreed interactions between team members are verified in relation to the action plan.

- 1.2 Individual roles and responsibilities in the team are defined in relation to the action plan.

Range evidence of at least four different team member roles is required.

- 1.3 Methods to resolve identified issues or problems occurring during the project are discussed and agreed upon and implemented in accordance with the action plan.

Range evidence of two methods is required.

- 1.4 Project is successfully completed in accordance with the action plan.

Outcome 2

Evaluate the action plan in relation to the completion of the project.

Performance criteria

- 2.1 The action plan is evaluated in terms of successful project completion, and any recommendations for process improvement are made.

Planned review date	31 December 2030
