

Title	Make patterns and/or tooling for use in industry		
Level	4	Credits	20

Purpose	People credited with this unit standard are able to prepare for patterns and/or tooling manufacture, and make patterns and/or tooling.
----------------	--

Classification	Mechanical Engineering > Engineering Patternmaking
-----------------------	--

Available grade	Achieved
------------------------	----------

Entry information	
Recommended skills and knowledge	Unit 29634, <i>Make patterns and/or tooling under supervision for use in industry</i> , or demonstrate equivalent knowledge and skills.

2 Definition

Accepted industry practice refers to approved codes of practice and standardised procedures accepted by the industry sector as examples of best practice.

Workplace procedures refer to procedures used by the organisation carrying out the work and applicable to the tasks being carried out. They may include but are not limited to – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.

- 3 Range
Evidence must be demonstrated in one industry accepted test piece involving hand and machine operations and one of the three material types:
- a Wood.
 - b Metal.
 - c Composite.
- 4 Assessment Information
- a All activities must comply with relevant legislative and/or regulatory requirements, which include, but are not limited to those listed in the references.
 - b All activities must comply with applicable workplace procedures and must be consistent with accepted industry practice.

Outcomes and evidence requirements

Outcome 1

Prepare for patterns and/or tooling manufacture.

Evidence requirements

- 1.1 Patterns and/or tooling specifications are established in accordance with job sheet, drawings, sample, and/or specification.
- 1.2 Patterns and/or tooling layout drawings are completed to meet manufacturing requirements.
- 1.3 Material for patterns and/or tooling is selected to meet specification and process.

Outcome 2

Make patterns and/or tooling.

Evidence requirements

- 2.1 Patterns and/or tooling are formed using tools and equipment appropriate to the job and material used.
- 2.2 Patterns and/or tooling are measured and are within tolerance in specification.
- 2.3 Patterns and/or tooling surfaces are finished to job requirements in accordance with workplace procedures.
- 2.4 Patterns and/or tooling are confirmed as functionally meeting the requirements of specification.
- 2.5 Patterns and/or tooling are customer-identified in accordance with specification.

Replacement information	This unit standard replaced unit standards 2367, 2368, and 2369

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	18 August 2016	N/A

Consent and Moderation Requirements (CMR) reference	0013
--	------

This CMR can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Please note

Providers must be granted consent to assess against standards (accredited) by NZQA, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Requirements for consent to assess and an outline of the moderation system that applies to this standard are outlined in the Consent and Moderation Requirements (CMR). The CMR also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
