Guidance Information

Definition

A *business need* is any improvement required to meet production targets.

Outcomes and performance criteria

Outcome 1

Identify a business need for a client and investigate a range of technical products and services to provide a solution.

Performance criteria

1.1 Identify parameters in terms of the business need.

Range parameters may include but are not limited to – business goals, costs, timeframes, and impacts of delays; evidence of three parameters is required.

1.2 Analyse appropriate technical products and services to provide a solution in terms of the business need.

Range a minimum of two different technical products and services is required.

Outcome 2

Formulate a solution to meet the identified business need.

Performance criteria

- 2.1 Recommend the product and service to meet the requirements in terms of the business need.
- 2.2 Identify the suppliers or vendors to deliver the recommended products and services in terms of the business need.
- 2.3 Research any similar products and services from competitors, and provide justification for the recommendation in terms of the business need.
- 2.4 Identify risks and any other variables that may impact on the implementation of the proposed solution in terms of the business need.
- 2.5 Formulate a solution to present to the client in terms of the business need.
- Range solution must include an implementation plan, and cost benefit analysis.
