

Title	Manage, monitor and optimise ozone disinfection processes for drinking-water treatment		
Level	5	Credits	10

Purpose	People credited with this unit standard are able to: manage, monitor and optimise ozone disinfection processes for drinking-water treatment.
----------------	--

Classification	Water Industry > Water Treatment
-----------------------	----------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable legislative and industry requirements.
- Legislation and references relevant to this unit standard include: Health and Safety at Work Act 2015, Water Services Act 2021, Hazardous Substances and New Organisms (HSNO) Act 1996, and subsequent amendments; Ministry of Health, *Drinking-water Standards for New Zealand*, Ministry of Health, Wellington, 2005 (Revised 2018), and subsequent replacements, available at www.taumataarowai.govt.nz.
- Definitions
Critical control point – specific point, procedure, or step in water treatment processes at which control can be exercised to reduce, eliminate, or prevent the possibility of a public health hazard.
Industry requirements include manufacturers' specifications; and enterprise requirements which may include documented workplace policies, procedures, specifications, business, and quality management requirements relevant to the workplace in which assessment is carried out.
Optimise – adjusting plant input variables to make the process as effective as possible in order to achieve the desired output.
- Learning and assessment activities for this unit standard must be informed by Te Mana o te Wai (refer to [Taumata Arowai](http://www.taumataarowai.govt.nz)) and the *National Policy Statement for Freshwater Management 2020* available from <https://environment.govt.nz/>.

Outcomes and performance criteria

Outcome 1

Manage ozone disinfection processes for drinking-water treatment.

Performance criteria

- 1.1 Process variables and critical control points are managed to achieve the required parameters and maintain process performance.
- 1.2 Ozone disinfection equipment is managed.

Outcome 2

Monitor ozone disinfection processes for drinking-water treatment.

Performance criteria

- 2.1 Monitoring is managed.
- 2.2 Monitoring data is collected, interpreted and reported.

Outcome 3

Optimise ozone disinfection processes for drinking-water treatment.

Performance criteria

- 3.1 The ozone disinfection process variables and operating factors are adjusted to achieve optimal performance in accordance with the results of monitoring.

Replacement information	This unit standard replaced unit standards 24901 and 24971.
--------------------------------	---

Planned review date	31 December 2027
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	16 March 2017	31 December 2024
Review	2	26 May 2022	N/A

Consent and Moderation Requirements (CMR) reference	0101
