Title	Describe and operate membrane filtration processes in drinking- water treatment		
Level	4	Credits	12

Purpose	People credited with this unit standard are able to: describe membrane filtration processes; monitor and adjust the membrane filtration process; and carry out maintenance procedures on membrane filtration equipment; in drinking-water treatment.
	·

Classification	Water Industry > Water Treatment
----------------	----------------------------------

Available grade	Achieved
-----------------	----------

Guidance Information

- 1 Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable legislative and industry requirements.
- Legislation and references relevant to this unit standard include: Health and Safety at Work Act 2015, Water Services Act 2021, Hazardous Substances and New Organisms (HSNO) Act 1996, and subsequent amendments; Ministry of Health, *Drinking-water Standards for New Zealand*, Ministry of Health, Wellington, 2005 (Revised 2018), and subsequent replacements, available at www.taumataarowai.govt.nz.
- Definition

 Industry requirements include manufacturers' specifications; and enterprise requirements which may include documented workplace policies, procedures, specifications, business, and quality management requirements relevant to the workplace in which assessment is carried out.
- 4 Learning and assessment activities for this unit standard must be informed by Te Mana o te Wai (refer to <u>Taumata Arowai</u>) and the *National Policy Statement for Freshwater Management 2020.* available from https://environment.govt.nz/.

Outcomes and performance criteria

Outcome 1

Describe membrane filtration processes in drinking-water treatment.

NZQA unit standard 29989 version 2
Page 2 of 3

Performance criteria

1.1 Regulations and drinking-water standards relevant to membrane filtration are described in terms of their purpose, requirements, and consequences of non-compliance.

- 1.2 Membrane filtration theory is described in terms of particulate matter removal.
- 1.3 Membrane filtration is described in terms of methods, operation, and factors that affect performance.
- 1.4 The membrane filtration process is described in terms of the function of its component parts and identification of process failure.

Outcome 2

Monitor and adjust the membrane filtration process in drinking-water treatment.

Performance criteria

- 2.1 Monitoring equipment is calibrated, if required, tests or measurements for monitoring the process are carried out, and results are recorded, in accordance with *Drinking-water Standards for New Zealand* compliance requirements.
- 2.2 Process is adjusted.

Range

reasons for adjustment may include – results of monitoring and testing, analysis and identification of trends, response to process failure.

2.3 Consumables are checked and ordered.

Outcome 3

Carry out maintenance procedures on membrane filtration equipment in drinking-water treatment.

Performance criteria

- 3.1 Preventative maintenance procedures are carried out, and recorded.
- 3.2 Any required repairs are carried out according to process and/or equipment failure, and recorded.
- 3.3 Procedures for maintaining process continuity are carried out.

Replacement information	This unit standard replaced unit standard 24961.
