

Title	Demonstrate knowledge of the installation and maintenance of solid fuel space heaters and flues		
Level	4	Credits	3

Purpose	<p>This unit standard is for people who work, or intend to work, in the plumbing industry.</p> <p>People credited with this unit standard are able to:</p> <ul style="list-style-type: none"> – demonstrate knowledge of regulatory requirements, selection of methods and materials, and underpinning concepts and principles, as applied to the installation and maintenance of solid fuel space heaters and flues; – describe positioning of solid fuel space heaters and flues; – describe installation of solid fuel space heaters and flues; and – demonstrate knowledge of maintaining solid fuel space heaters and flues.
----------------	---

Classification	Plumbing, Gasfitting and Drainlaying > Plumbing
-----------------------	---

Available grade	Achieved
------------------------	----------

and all subsequent amendments and replacements.

2 Definitions

Job requirements – specific requirements of the job at hand not covered by job specifications.

Job specifications – instructions (oral, written, graphic) and may include any of the following: manufacturer instructions; design drawing detail specifications; specifications from a specialist source such as an architect, designer, engineer, or a supervisor; and site or work specific requirements. Where job specifications are in conflict with applicable legislation, standards, and/or codes, such legislation, standards, and/or codes shall take precedence for the purpose of assessment.

Maintain may refer to all or any of – repair, upgrade, alter, remove.

3 Candidates must hold a current limited certificate or exemption under supervision as issued under the Plumbers, Gasfitters, and Drainlayers Act 2006.**Outcomes and performance criteria****Outcome 1**

Demonstrate knowledge of regulatory requirements, selection of methods and materials, and underpinning concepts and principles, as applied to the installation and maintenance of solid fuel space heaters and flues.

Performance criteria

1.1 Describe applicable sections of legislation, standards, and codes in terms of their application to the installation and maintenance of solid fuel space heaters and flues.

1.2 Justify selection of methods and materials.

Range job specifications, operation of the installed system and components, prudent use and longevity of materials; may include job requirements.

1.3 Explain underpinning concepts and principles in terms of their application to the installation and maintenance of solid fuel space heaters and flues.

Range combustion, conduction, convection, dew point, radiation.

1.4 Explain the implications on the installation of solid fuel space heaters of differences in fuel source.

Range wood, coal, pellet, alternative fuel sources.

Outcome 2

Describe positioning of solid fuel space heaters and flues.

Range inbuilt, insert, freestanding, alternative applications.

Performance criteria

2.1 Describe how to position solid fuel space heaters and flues to measurements in accordance with job specifications and relevant standards and codes.

Range combustion clearances, heat shields, structural integrity.

Outcome 3

Describe the installation of solid fuel space heaters and flues.

Performance criteria

3.1 Describe appropriate selection of solid fuel space heaters and flues in relation to job specifications and regulatory requirements.

3.2 Describe installation of solid fuel space heaters and flues in accordance with job specifications and relevant standards and codes.

3.3 Describe commissioning tests in accordance with relevant standards, codes, and manufacturer instructions.

Range flue spillage, emission and smoke, appliance surface temperatures, integrity of installation.

3.4 Explain content and importance of hand-over briefing to customer on completion of installation.

Outcome 4

Describe the maintenance of solid fuel space heaters and flues.

Performance criteria

4.1 Describe how to identify faults in terms of causes and means of rectification.

4.2 Describe the rectification of faults in accordance with maintenance requirements and job specifications.
