

Title	Repair or overhaul aircraft fire extinguisher components		
Level	4	Credits	5

Purpose	People credited with this unit standard are able to: prepare to repair or overhaul aircraft fire extinguisher components; locate defects in aircraft fire extinguisher components; repair or overhaul aircraft fire extinguisher components; test and adjust aircraft fire extinguisher components; and complete the repair or overhaul of aircraft fire extinguisher components.
----------------	---

Classification	Aeronautical Engineering > Aircraft Mechanical Repair and Overhaul
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definition
Enterprise procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
- 3 Repair or overhaul activities are those usually carried out in a specialist bay or workshop.
- 4 The scope of the system that this unit standard relates to is described in ATA iSpec 2200, chapter 26.

Outcomes and performance criteria

Outcome 1

Prepare to repair or overhaul aircraft fire extinguisher components.

Performance criteria

- 1.1 Task is determined by reviewing maintenance documentation and enterprise procedures.
- 1.2 Component identity is confirmed with documentation.

- 1.3 Work area is prepared, and resources obtained and checked for serviceability or status.

Range may include but is not limited to – publications, materials, tools, equipment, safety equipment, environmental conditions established.

- 1.4 Component is prepared for repair or overhaul.

Range may include but is not limited to – clean, inspect.

- 1.5 Next task is determined and documented.

Range may include but is not limited to – locate defects, repair or overhaul, test, adjust, complete the task.

Outcome 2

Locate defects in aircraft fire extinguisher components.

Performance criteria

- 2.1 Defects are located using troubleshooting techniques appropriate to the defect indications.

- 2.2 Defects found during troubleshooting are reported and documented.

Outcome 3

Repair or overhaul aircraft fire extinguisher components.

Performance criteria

- 3.1 Component is disassembled.

Range may include but is not limited to – clean, label, preserve, segregate, store.

- 3.2 Defects found during disassembly are reported and recorded.

- 3.3 Rectification action is determined and documented.

- 3.4 Replacement parts are procured and verified as authentic and serviceable.

Range identify, inspect.

- 3.5 Defects are rectified.

Range may include but is not limited to – repair or overhaul, replace, modify, adjust.

- 3.6 Component is assembled.

3.7 Inspections are obtained.

Outcome 4

Test and adjust aircraft fire extinguisher components.

Performance criteria

4.1 Component is prepared for testing.

4.2 Component is tested and adjusted.

Range may include but is not limited to – troubleshoot, functionally test, calibrate, adjust, document adjustments and performance.

4.3 Inspections are obtained.

Outcome 5

Complete the repair or overhaul of aircraft fire extinguisher components.

Performance criteria

5.1 Component is prepared.

Range may include but is not limited to – use, storage, transit, locking, inhibiting, blanking, packing.

5.2 Resources are checked for serviceability and returned to service or storage.

Range may include but is not limited to – tools, equipment, safety equipment, publications.

5.3 Leftover parts and materials are disposed of.

Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap.

5.4 Documentation is completed.

Range may include but is not limited to – labels, work cards, release notes, logbooks, shelf-life requirement, certification.

5.5 Work area is left in a state that enables the next task to begin.

Planned review date	31 December 2027
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	23 November 2017	31 December 2022
Review	2	23 July 2020	N/A
Rollover and Revision	3	27 June 2024	N/A
