### Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Carpentry – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Carpentry (Level 4) [Ref: 2738].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the skill specification:

- to current regulatory, industry and commercial standards;
- within a commercially viable timeframe;
- in commercial environments;
- without supervision;
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the carpentry trade and has had the opportunity to regularly observe the candidate in the workplace.

## Skill specification and performance level guidance

### Skill specification

Apply legislative frameworks to construction operations.

**Know** The health and safety legislative framework as it applies to the construction industry.

The environmental legislative framework as it applies to the construction industry.

The building legislative framework as it applies to the construction industry.

**Do** Apply the health and safety legislative framework in everyday contexts within construction operations.

Apply the environmental legislative framework in everyday contexts within construction operations.

Apply the building legislative framework in everyday contexts within construction operations.

### Performance level guidance

The legislative framework refers to the hierarchy of Acts of Parliament, Regulations, Rules, Codes, Standards, approved codes of practice and best or good practice guidelines.

The level of legislative knowledge required is that of an industry practitioner rather than that of an expert with specialist knowledge.
