Purpose	<p>This unit standard aligns with the New Zealand Certificate in Carpentry – Specifications, developed on behalf of the construction industry to specify the skills and knowledge required to achieve the New Zealand Certificate in Carpentry (Level 4) [Ref: 2738].</p> <p>This unit standard is intended for those working in the construction industry.</p> <p>People credited with this unit standard are able to plan and communicate for construction processes to the level required of a commercially competent carpenter.</p>
----------------	---

Classification	Construction Trades > Carpentry
-----------------------	---------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Carpentry – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Carpentry (Level 4) [Ref: 2738].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the skill specification:

- to current regulatory, industry and commercial standards;
- within a commercially viable timeframe;
- in commercial environments;
- without supervision;
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the carpentry trade and has had the opportunity to regularly observe the candidate in the workplace.

Skill specification and performance level guidance

Skill specification

Plan and communicate for construction processes.

Know The roles and responsibilities of the parties to a construction process.

How to plan and coordinate work to fit with the construction programme and other trades.

Do Work effectively with the parties to a construction process.

Communicate effectively with own team and parties to a construction process.

Performance level guidance

The parties to a construction process include the main contractor, subcontractors, clients, suppliers, designers, compliance bodies and neighbours.

Working effectively involves everyday contact on site and the ability to discuss and reach conclusions about work requirements and integration of activities.

Communicating effectively involves written, oral and graphic communication.

Replacement information	This unit standard was replaced by skill standards 40304 and 40305.
--------------------------------	---

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	1 March 2018	31 December 2027
Rollover and Revision	2	15 December 2022	31 December 2027
Review	3	28 November 2024	31 December 2027
