Classification	Construction Trades > Carpentry
-----------------------	---------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Carpentry – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Carpentry (Level 4) [Ref: 2738].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the skill specification:

- to current regulatory, industry and commercial standards;
- within a commercially viable timeframe;
- in commercial environments;
- without supervision;
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the carpentry trade and has had the opportunity to regularly observe the candidate in the workplace.

Skill specification and performance level guidance

Skill specification

Establish, maintain and disestablish a construction site.

Know How to identify the site, and understand and satisfy the requirements of building consent authorities and clients.

The facilities required to allow work to start and progress to be made throughout the build.

How to plan and programme to coordinate and manage equipment, materials, subcontractors and compliance requirements.

Access and delivery requirements.

Disposal of waste materials.

Temporary protection requirements of materials and work already completed.

How to disestablish the site ready for handover.

Do Identify the site, boundaries, position of building and any features, plants or physical attributes requiring specific consideration.

Organise the establishment of the necessary site facilities.

Devise a work programme.

Coordinate deliveries and maintain a workable site.

Disestablish the site and make good at the end of the job.

Performance level guidance

Facilities include power, water, sheds, ablution facilities, storage, fences, hoardings and any other provisions necessary.

Disposal of waste materials includes the ongoing clean-up and maintenance of site waste as well as the provision of areas for plant wash-down and the correct disposal and management of hazardous materials.

The level of complexity for site establishment and maintenance is equivalent to that associated with the construction of a conventional, two story dwelling. There is no expectation or requirement for a candidate to manage the contract for a construction project of this size.

Planned review date	31 December 2023
