Classification	Construction Trades > Painting and Decorating
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Painting and Decorating – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Painting and Decorating (Level 4) with strands in Specialised Spraying, Wallcoverings, and Specialised Coatings [Ref: 3568].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the skill specification:

- to current regulatory, industry and commercial standards
- within a commercially viable timeframe
- in commercial environments
- without supervision
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the painting and decorating trade and has had the opportunity to regularly observe the candidate in the workplace.

Skill specification and performance level guidance

Skill specification

Apply specialised coating systems.

Know The handling and application requirements associated with different specialised coatings.

The requirements for, and methods of surface preparation for different specialised coatings.

How to different specialised coatings are applied.

Finish and quality control requirements for different specialised coatings.

Maintenance requirements for different specialised coatings.

Limitations and failures in different specialised coatings and how they are remedied.

Do Select appropriate specialised coating systems and methods of application for specialised coating jobs.

Handle and store specialised coatings.

Apply specialised coatings and any required finishing coats.

Perform remedial work on specialised coatings.

Performance level guidance

Specialised coatings include liquid membranes, protective paint coating systems, intumescent coatings, industrial coatings, and finish coatings to proprietary plaster cladding systems.

Requirements include requirements of codes, standards and manufacturer and system specifications.

The level of performance required is knowledge of a range of specialised coatings and commercial competence in the use of at least one category of specialised coatings (including a range of systems within that category).
