### Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Proprietary Systems Installation – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Proprietary Systems Installation (Level 4) with strands in Proprietary Partitions, and Suspended Ceilings [Ref: 3060].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the unit specification:

- to current regulatory, industry and commercial standards
- within a commercially viable timeframe
- in commercial environments
- without supervision
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the proprietary partitions installation trade and has had the opportunity to regularly observe the candidate in the workplace.

## Skill specification and performance level guidance

### Skill specification

Demonstrate understanding of, and receive, handle and store, materials used for installing proprietary partitions.

**Know** Types, properties and components of proprietary partition systems.

Types, properties and uses of sheet linings.

Types, properties and uses of fasteners and fixings used when constructing and lining proprietary partition systems.

How to handle and store materials.

**Do** Receive, handle and store materials.

### Performance level guidance

Types of proprietary partition include steel and aluminium partitioning suites.

Properties of proprietary partition systems include the physical composition and attributes of the different systems and individual components that make up the different systems.

Types of sheet linings include plaster board and fibre cement sheet.

Properties of sheet lining materials include physical composition and attributes such as size, thickness, finish, edge treatments, and the ability to form into curves, resist impact, fire, sound, etc.

The level of materials knowledge required is that of an industry practitioner rather than that of an expert with specialist knowledge.
