Classification	Construction Trades > Plaster Board
-----------------------	-------------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Interior Linings – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Interior Linings Installation (Level 4) with strands in Fixing and Finishing (with optional strand in Fibrous Plaster Installation) [Ref: 3061].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the unit specification:

- to current regulatory, industry and commercial standards
- within a commercially viable timeframe
- in commercial environments
- without supervision
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the interior linings installation trade and has had the opportunity to regularly observe the candidate in the workplace.

Skill specification and performance level guidance

Skill specification

Read and interpret drawings and specifications and apply them to undertake interior linings installation projects.

Know The key components that make up a set of working drawings.

How to read and interpret a set of working drawings to identify interior lining requirements.

The key components that make up a specification.

How to read and interpret a specification to identify interior lining requirements.

Do Read and interpret working drawings and specifications and apply them to undertake interior linings installation projects.

Confirm that working drawings and specifications match actual site conditions.

Performance level guidance

Interpreting a set of working drawings includes understanding drawing conventions including drawing types, scales, symbols, dimensions and abbreviations.

Working drawings include floor plans, elevations, cross sections and detail drawings.

Specifications include the written documentation associated with a set of working drawings for a specific job and items of manufacturers' literature that outline the requirements for the use and application of their interior lining systems and products.

The minimum level to which a set of working drawings and specifications needs to be understood and interpreted is to allow the interior linings trades to complete the required work.
