

Title	Demonstrate understanding of and receive, handle and store materials used for finishing interior linings		
Level	4	Credits	7

Purpose	<p>This unit standard is intended for those working in the interior linings industry.</p> <p>People credited with this unit standard are able to demonstrate understanding of and receive, handle and store materials used for finishing interior linings to the level required of a commercially competent interior linings finisher.</p>
----------------	--

Classification	Construction Trades > Plaster Board
-----------------------	-------------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Interior Linings Installation – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Interior Linings Installation (Level 4) with strands in Fixing and Finishing (with optional strand in Fibrous Plaster Installation) [Ref: 3061].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the unit specification:

- to current regulatory, industry and commercial standards
- within a commercially viable timeframe
- in commercial environments
- without supervision
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the interior linings installation trade and has had the opportunity to regularly observe the candidate in the workplace.

Skill specification and performance level guidance

Skill specification

Demonstrate understanding of and receive, handle and store materials used for finishing interior linings.

Know Types, properties and uses of stopping and finishing compounds used to finish interior sheet linings.

Types, properties and uses of tapes, mouldings and trim used when finishing interior sheet linings.

Types, properties and uses of paper-faced cove.

Types properties and uses of fibrous plaster cornice.

Types, properties and uses of bonding plaster.

How to handle and store materials.

Do Receive, handle and store materials used for finishing interior linings.

Performance level guidance

Materials include compounds, tapes, mouldings and trim, paper-faced cove and bonding plaster.

Types of sheet linings include plaster board and fibre cement board.

Types of tapes, mouldings and trim include any site-formed or pre-formed item installed and bedded in position by an interior linings finisher at internal and external corners, edges, junctions and joins.

The level of materials knowledge required is that of an industry practitioner rather than that of an expert with specialist knowledge.

Type of fibrous plaster cornice will be plain (unpatterned).

Planned review date	31 December 2025
