

Title	Use and maintain tools and equipment in an interior linings installation context		
Level	4	Credits	6

Purpose	<p>This unit standard aligns with the <i>New Zealand Certificate in Interior Linings Installation – Specifications</i>, developed on behalf of the interior linings industry to specify the skills and knowledge required to achieve the New Zealand Certificate in Interior Linings Installation (Level 4) with strands in Fixing, and Finishing (with optional strand in Fibrous Plaster Installation) [Ref: 3061].</p> <p>This unit standard is intended for those working in the interior linings industry.</p> <p>People credited with this unit standard are able to use and maintain tools and equipment in an interior linings installation context to the level required of a commercially competent interior linings installer.</p>
----------------	---

Classification	Construction Trades > Plaster Board
-----------------------	-------------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Interior Linings Installation – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Interior Linings Installation (Level 4) with strands in Fixing, and Finishing (with optional strand in Fibrous Plaster Installation) [Ref: 3061].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the unit specification:

- to current regulatory, industry and commercial standards
- within a commercially viable timeframe
- in commercial environments
- without supervision
- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the interior linings installation trade and has had the opportunity to regularly observe the candidate in the workplace.

Skill specification and performance level guidance

Skill specification

Use and maintain tools and equipment in an interior linings installation context.

- Know**
- The use and application of hand tools used by the interior linings trade.
 - The use and application of power tools used by the interior linings trade.
 - The use and application of different items of equipment used by the interior linings trade.
 - The use and application of different items of access equipment used by the interior linings trade.
 - How to care for and maintain different tools and equipment used by the interior linings trade.
- Do**
- Use a range of hand tools.
 - Use a range of power tools.
 - Use a range of equipment.
 - Erect, alter, inspect and dismantle non-notifiable scaffolding.
 - Maintain tools and equipment.

Performance level guidance

The different types of tools and equipment varies depending on the interior lining materials and trade specialty (fixing or finishing).

Hand tools are those which are typically used by each interior linings trade specialty (fixing or finishing) on a daily basis.

Power tools are those which are typically used by each interior linings trade specialty (fixing or finishing) on a daily basis.

Access equipment includes ladders, all types of scaffolding and all types of elevating work platforms (EWPs).

Different items of equipment include all types of motorised or manually operated equipment associated with interior linings work.

Non-notifiable scaffolding is any scaffold where the height of the working platform is less than 5m.

Maintenance requirements differ depending on the tool or piece of equipment concerned.
