### Guidance Information

This unit standard is one of a family of standards that align with the *New Zealand Certificate in Trowel Trades – Specifications* and should be read, interpreted and assessed in the context of those *Specifications* and the New Zealand Certificate in Trowel Trades (Level 4) with strands in Brick and Block Laying, Floor and Wall Tiling, Proprietary Plaster Cladding Systems, Ferro-cement Tank Manufacture, Refractory Installation, and Solid Plastering (with optional strands in Fixing Cavities and Substrates, and Decorative Mouldings) [Ref: 3137].

The overarching level of performance for the family of unit standards is commercial competence.

Commercial competence requires a candidate to be capable of consistently performing the requirements of the unit specification:

- to current regulatory, industry and commercial standards
- within a commercially viable timeframe
- in commercial environments
- without supervision

- in different and unfamiliar contexts.

The sufficiency of evidence required to demonstrate commercial competence against this unit standard is determined within the context of the family of unit standards aligned to the *Specifications*.

The assessor must be confident that the candidate is capable of applying the skills and knowledge included in this skill specification to the level, scope and complexity required to support the achievement of related skills included in the *Specifications*.

Commercial competence can only be demonstrated, and must be assessed, in the workplace.

The assessment of commercial competence must be corroborated and confirmed by a person who has current expertise in the refractory installation trade and has had the opportunity to regularly observe the candidate in the workplace.

## Skill specification and performance level guidance

### Skill specification

Demonstrate understanding of consenting and permit requirements, and meet requirements for refractory installation work.

**Know** How the consenting process operates in the New Zealand construction industry.

The requirements and responsibilities of undertaking consented work in the context of refractory installation.

How permits to work operate in the context of refractory installation work.

**Do** Undertake refractory installation work to meet building consent compliance.

Undertake refractory installation work to adhere to permits to work.

### Performance level guidance

It is not a requirement to be a licensed building practitioner, but work completed must meet the legislated requirements.

Consenting processes involve both resource and building consents.

Permits to work include hot work, confined space, job safety environmental analysis and pre-commissioning inspections.

<b>Replacement information</b>	This unit standard was replaced by unit standard 33077.
--------------------------------	---

**This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.**
