----------------	---

Classification	Motor Industry > Vehicle Bodywork
-----------------------	-----------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable service information, and company requirements and legislative requirements. This includes the knowledge and use of suitable tools and equipment.
- 2 Legislation, regulations and/or industry standards relevant to this unit standard include but are not limited to the current version of the:
 - Health and Safety at Work Act 2015;
 - and any subsequent amendments and replacements.
- 3 Definitions

All-terrain vehicle or *ATV* means a vehicle, with or without motorcycle controls and equipment that is principally designed for off-road use, and has three or more wheels.

Company requirements refer to instructions to staff on policy and procedures that are available in the workplace. These requirements may include – company policies and procedures, work instructions, product quality specifications and legislative requirements.

Roll-over protection system is a structure intended to protect equipment operators from injuries caused by vehicle overturns or rollovers.

Service information may include – technical information for a vehicle, machine, or product detailing operation; installation and servicing procedures; manufacturer instructions; technical terms and descriptions; and detailed illustrations.

Outcomes and performance criteria

Outcome 1

Describe ATV occupant safety systems.

Performance criteria

- 1.1 Functions and operation of occupant restraints are described.

1.2 The function of a roll-over protection system is described.

Planned review date	31 December 2023
