----------------	---

Classification	Infrastructure Works > Infrastructure Works Supervision
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Legislation and references relevant to this unit standard include any Acts, Regulations, Rules, Standards, approved codes of practice and best or good practice guidelines relevant to the candidate's own sector of the infrastructure industry.
- 2 Definitions

Company requirements include the policy, procedures, and methodologies of the company. They include legislative and regulatory requirements which may apply across the company or to a specific site. Requirements are documented in the company's health and safety plans, traffic management plans, contract work programmes, quality assurance programmes, policies, and procedural documents.

Contract specifications include plans, diagrams, and special technical conditions. They do not include special administrative conditions.

Industry standards are documents that set out detailed requirements for specific types of work, and may include standards published at <http://www.standards.govt.nz> and/or industry specifications set by peak bodies such as NZ Transport Agency.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of industry best practice for an infrastructure works sector.

Performance criteria

- 1.1 The relationship between Acts of Parliament, Regulations, Rules, Standards, approved codes of practice and best or good practice guidelines is described and explained as it applies to a sector of the infrastructure industry.

- 1.2 Licencing and certification requirements that apply to a sector of the infrastructure industry are described and explained in terms of company requirements and impact on work, supervision, and training practices.
- 1.3 Formal training that applies to a sector of the infrastructure industry is identified and explained in terms of its relationship to industry best practice, contract specifications, and company requirements. Selection criteria for training are described in accordance with company requirements.
- 1.4 The purpose and requirements of specific industry best practice documents are explained in terms of their implications for supervision of daily operations on an infrastructure work site.
- Range two documents which may be selected from – best or good practice guidelines, approved codes of practice, industry standards.
- 1.5 Ramifications of non-compliance with industry best practice are explained in terms of legislative consequences and impacts on supervision of operational activities.
- 1.6 Ongoing monitoring and recording of implementation of industry best practice in own workplace is described in accordance with company requirements.
