Outcomes and performance criteria

Outcome 1

Describe food components, nutritional requirements, diets, and feeding of dogs.

Performance criteria

- 1.1 Describe components of food in terms of their sources and functions in the body.
- Range protein, carbohydrates, fats, water;
vitamins – A, B, C, D, E, K;
minerals – calcium, phosphorous, iron.
- 1.2 Describe nutritional requirements of dogs in terms of the variations due to life stages and body condition and breed.
- Range pre-weaning, at weaning, puppy, adult, senior;
pregnancy, lactation;
working dog, toy breed, large breed.
- 1.3 Describe dog feed types in terms of their advantages and disadvantages, and storage requirements.
- Range wet, dry, raw;
evidence of at least two advantages and two disadvantages is required.
- 1.4 Describe the potential impacts of an unbalanced diet on dog health.
- Range includes but is not limited to – all meat, vegetarian.
- 1.5 Describe the types and uses of feeding and watering equipment for dogs.

Outcome 2

Describe health, variations to normal health and behaviour, the oestrus cycle, mating, and situations requiring isolation.

Performance criteria

- 2.1 Describe the clinical signs of normal and variations to normal health and behaviour.
- Range evidence of at least three clinical signs of normal and three clinical signs of variations to normal is required.
- 2.2 Describe the stages, physical signs, behavioural changes, and frequency of the oestrus cycle.
- Range evidence of at least two physical signs and two behavioural changes is required.
- 2.3 Describe the normal sequence of mating.
- 2.4 Describe the clinical signs requiring isolation of dogs.
- Range evidence of at least two clinical signs is required.

Outcome 3

Describe the ideal condition of a dog, and carry out routine health procedures for a dog.

Performance criteria

- 3.1 Describe the ideal physical condition of the dog.
- Range condition of – body, skin, coat, eyes, ears, mouth, nose.
- 3.2 Describe the procedures for clipping claws.
- 3.3 Carry out routine health procedures for dogs.
- Range oral medication – tableting, liquid;
topical medication must include ear and eye medication.

Outcome 4

Describe infectious diseases and parasites of dogs, and their prevention and control programmes.

Performance criteria

- 4.1 Describe the clinical signs, methods of transmission, prevention, and control programmes of infectious diseases.
- Range at least four infectious diseases from – canine parvovirus, canine distemper virus, Bordetella bronchiseptica, canine leptospirosis, canine parainfluenza virus, canine adenovirus Type I and II.

4.2 Describe the clinical signs, methods of transmission, prevention, and control programmes of parasites.

Range two internal parasites from – roundworm, hookworm, tapeworm, whipworm;
two external parasites from – fleas, lice, mites, ticks.

Outcome 5

Identify and describe ideal features of commercial dog housing.

Performance criteria

5.1 Identify and describe the ideal features of commercial dog housing.

Range includes but is not limited to – internal materials, size, safety features, security, environmental enrichment, comfort, waste disposal, isolation facility.
