

Title	Maintain outdoor power equipment cutting systems, and diagnose and repair faults		
Level	4	Credits	4

Purpose	People credited with this unit standard are able to: maintain outdoor power equipment cutting systems; and diagnose and repair faults in outdoor power equipment cutting systems.
----------------	---

Classification	Motor Industry > Automotive Preventive Maintenance
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable service information, and company requirements and legislative requirements. This includes the knowledge and use of suitable tools and equipment.
- 2 Legislation, regulations and/or industry standards relevant to this unit standard include but are not limited to the current version of the Health and Safety at Work Act 2015; and any subsequent amendments and replacements.
- 3 Definitions
Company requirements refer to instructions to staff on policy and procedures that are available in the workplace. These requirements may include – company policies and procedures, work instructions, product quality specifications and legislative requirements.
Service information may include – technical information for a vehicle, machine, or product detailing operation; installation and servicing procedures; manufacturer instructions; technical terms and descriptions; and detailed illustrations.
- 4 It is recommended that people seeking credit for this unit standard first hold credit for Unit 31891, *Demonstrate knowledge of outdoor power equipment cutting systems, and describe their maintenance and fault diagnosis..*

Outcomes and performance criteria

Outcome 1

Maintain outdoor power equipment cutting systems.

Range evidence of maintaining two separate cutting systems is required.

Performance criteria

1.1 Cutting systems are maintained.

Range may include – sharpening, clearances, angles, safety systems and guards;
cutting systems may include – reel; flail; reciprocating; bar and chain; knives and anvils; rotary blade, disc.

Outcome 2

Diagnose and repair faults in outdoor power equipment cutting systems.

Range evidence of two separate faults that necessitate the disassembly of the cutting system is required.

Performance criteria

2.1 Cutting system faults are diagnosed.

Range cutting systems may include – reel, flail, reciprocating, bar and chain, knives and anvils, rotary blade, disc.

2.2 Cutting system faults are repaired.

Planned review date	31 December 2024
