Title	Repair damaged or faulty composite items		
Level	4	Credits	5

Purpose	People credited with this unit standard are able to: evaluate the scope of repair work; prepare materials and equipment; and repair damaged or faulty composites items.
	repair damaged of faulty composites items.

Classification	Composites > Industrial Composites
Available grade	Achieved

Guidance Information

- 1 All work practices must meet recognised codes of practice such as the Code of Practice for Health and Safety in the Manufacture of Composites Based on Synthetic Resins (Fibreglass), 1998, available at <u>http://www.worksafe.govt.nz</u>, and documented worksite health and safety procedures (where these exceed code) for personal, product, and worksite health and safety, and must meet the obligations required under legislation.
- 2 Learners undertaking assessment against this unit standard are expected to comply with the following legislation and subsequent amendments
 - Health and Safety at Work Act 2015
 - Health and Safety in Employment Regulations 1995
 - Resource Management Act 1991
 - Hazardous Substances and New Organisms Act 1996.
- 3 Definitions

Equipment refers to grinder, applicators, dispensers, measuring devices, and cutters. *Job specifications* refers to the standard requirements of the job being undertaken. *Process specification* refers to the documented instructions and method of applying the materials to manufacture the item. (For example: time, materials, temperature, application rates).

Product specification refers to the documented requirements of the manufactured item.

Workplace policies and procedures refers to the documented procedures and policies providing guidelines of the tasks and activities carried out in the workplace. This typically includes relevant health and safety requirements to eliminate hazard/risk in the workplace.

- 4 Assessment does not include painting of the composite.
- 5 Evidence of three repaired composite items is required.

Outcomes and performance criteria

Outcome 1

Evaluate the scope of repair work.

Performance criteria

1.1 Repair scope is determined in terms of composite damage.

Outcome 2

Prepare materials and equipment to repair damaged or faulty composites items.

Performance criteria

2.1 Materials and equipment are prepared in accordance with job specifications.

Range materials include – resins, catalysts, reinforcements, cores, fillers.

Outcome 3

Repair damaged or faulty composite items.

Performance criteria

- 3.1 Damaged or faulty composite items are repaired in accordance with product and process specifications, and workplace policies and procedures.
- 3.2 Finished items are checked and remedial action is taken if required to ensure product specifications are met.

Planned review date	31 December 2021
