---

### Guidance Information

- 1 Learning and assessment for this unit standard must be in accordance with the following:

- Health and Safety at Work Act 2015;
- Resource Management Act 1991;
- Land Transport Act 1998;
- Land Transport Rule: Setting of Speed Limits 2017;
- Land Transport (Road User) Rule 2004.

- 2 Definitions

*Company requirements* include the policy, procedures, and methodologies of the company. They include legislative and regulatory requirements that may apply across the company or to a specific worksite. Requirements are documented in the company health and safety plans, traffic management plans (TMPs), contract work programmes, quality plans, policies, and procedural documents.

*Worksite* refers to the section of road defined at each end by advance warning and end of works signs.

---

### Outcomes and performance criteria

#### Outcome 1

Demonstrate knowledge of the STMS role on the worksite under TTM.

**Performance criteria**

- 1.1 The role of the STMS is explained in terms of setup, change and removal of the worksite under TTM in accordance with company requirements.
- 1.2 The attributes and skills of the STMS are explained in terms of requirements for working on the worksite under TTM.
- 1.3 The role of the STMS in risk assessment requirements for the worksite under TTM are explained in terms of what can go wrong in accordance with company requirements.
- 1.4 The role of STMS in briefings and inductions for the worksite under TTM are explained in terms of instructions and information given and in accordance with company requirements.
- 1.5 The STMS role in planning a deployment, worksite setup, and calculating resources is explained in accordance with company requirements.
- 1.6 The STMS role in maintaining the worksite under TTM is explained in accordance with company requirements.
- 1.7 The STMS role is explained in terms of end of work procedures and the removal of the worksite under TTM in accordance with company requirements.
