Classification	Infrastructure Works > Temporary Traffic Management
-----------------------	-----------------------------------------------------

Available grade	Achieved
------------------------	----------

Prerequisites	Unit 31961, <i>Explain the requirements for the worksite under temporary traffic management</i> , or demonstrate equivalent skills and knowledge.
----------------------	---------------------------------------------------------------------------------------------------------------------------------------------------

Guidance Information

- Learning and assessment for this unit standard must be in accordance with the following:
 - Health and Safety at Work Act 2015;
 - Resource Management Act 1991;
 - Land Transport Act 1998;
 - Land Transport Rule: Setting of Speed Limits 2017;
 - Land Transport (Road User) Rule 2004;
 - *Code of practice for temporary traffic management (CoPTTM)*; and all subsequent amendments and replacements.
- Assessment for this unit standard must use the Waka Kotahi NZ Transport Agency and Connexis approved assessments and Assessors.

Assessment must cover a road environment as defined by CoPTTM.

- Definitions
Company requirements include the policy, procedures, and methodologies of the company. They include legislative and regulatory requirements that may apply across the company or to a specific worksite. Requirements are documented in the

company health and safety plans, traffic management plans (TMPs), contract work programmes, quality plans, policies, and procedural documents.

Worksite refers to the section of road defined at each end by advance warning and end of works signs.

Outcomes and performance criteria

Outcome 1

Explain the requirements for the worksite under TTM for a road environment as defined in CoPTTM.

Performance criteria

- 1.1 Risk assessment requirements for the worksite under TTM for a road environment are explained in accordance with CoPTTM and company requirements.
- 1.2 Requirements for the STMS in relation to the road environment for the worksite are explained in terms of CoPTTM and company requirements.
- Range traffic counts, implementing contingencies, briefing the manual traffic controller (MTC), communications with on-site TTM personnel.
- 1.3 Requirements for static layout distances for the worksite under TTM for a road environment are explained in accordance with CoPTTM.
- 1.4 Requirements for the TTM worksite controls for a road are explained in accordance with CoPTTM.
- 1.5 Requirements for installation, maintenance and removal of the TTM worksite controls for a road environment are explained in accordance with CoPTTM.
