----------------	--

Classification	Electricity Supply > Electricity Supply - Distribution Networks
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 This unit standard underpins one of two capstone assessments for registration with the EWRB for the practical skill set of a traction line mechanic in the electricity supply sector.
- 2 Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable asset owner, company, and legislative requirements.
- 3 Legislation, regulations and/or industry standards relevant to this unit standard include but are not limited to the:
 - Health and Safety at Work Act 2015
 - Electricity Act 1992
 - Electricity (Safety) Regulations 2010; and any subsequent amendments and replacements
 - Electricity supply industry codes of practice and documented enterprise procedures, including *Safety Manual – Electricity Industry (SM-EI)* (2015) Wellington: Electricity Engineers' Association available from www.eea.co.nz.
- 4 Definition
Asset owner or *company requirements* refer to instructions to staff on policy and procedures that are available in the workplace. These requirements may include – asset owner policies and procedures, company policies and procedures, work instructions, product quality specifications and legislative requirements.
