

Title	Demonstrate knowledge of the Intelligence function within the Coordinated Incident Management System		
Level	4	Credits	2

Purpose	<p>This unit standard is intended for individuals operating as an Intelligence function team member within New Zealand's Coordinated Incident Management System (CIMS).</p> <p>People credited with this unit standard are able to:</p> <ul style="list-style-type: none"> – demonstrate knowledge of the Intelligence function within the CIMS; – demonstrate knowledge of the Intelligence Cycle within the CIMS.
----------------	---

Classification	Community and Workplace Fire and Emergency Management > Workplace Emergency Risk Management
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Recommended skills and knowledge for entry: Unit 29554, *Apply operational knowledge of New Zealand's Coordinated Incident Management System*.
- 2 All performance criteria must be in accordance with: CIMS manual, principles, and guidelines.
- 3 Reference
The primary reference for this unit standard is the most current edition of the *New Zealand Coordinated Incident Management System (CIMS)*, available at <https://www.civildefence.govt.nz>.
- 4 CIMS Terminology is used throughout this unit standard. Definitions of key terms are found in the Glossary section of the primary reference. The Intelligence Cycle is found in the Appendix section of the primary reference.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of the Intelligence function within the CIMS.

Performance criteria

- 1.1 Describe the roles and responsibilities of the Intelligence function in relation to incident management.
- Range may include but is not limited to – sub-functions, inputs, outputs, key responsibilities.
- 1.2 Describe the key internal and external relationships and interdependencies for the Intelligence function.
- Range internal relationships must include – the Controller, PIM, Planning, Operations, Logistics;
external relationships may include but are not limited to – partner agencies, support agencies, coordination centres, community;
evidence of at least two external relationships is required.
- 1.3 Explain how the structure of the Intelligence function and sub-functions may change in relation to response size and incident complexity.
- Range may include but is not limited to – the need for each sub-function, how sub-functions may be amalgamated and staffed.
- 1.4 Explain how the focus and requirements of the Intelligence function vary across different response levels, size, and incident complexity.
- 1.5 Explain how factors can limit the Intelligence function in relation to incident management.
- Range may include but is not limited to – the Controller’s intent and direction; freedoms and constraints; information from other functions, support agencies and the public; accuracy, timeliness, and reliability of information; analytic capability;
evidence of three is required.
- 1.6 Explain the interrelationships between the sub-functions in the Intelligence function.

Outcome 2

Demonstrate knowledge of the Intelligence Cycle within the CIMS.

Performance criteria

- 2.1 Outline the steps of the Intelligence Cycle in sequential order.
